

Module 1: Setting the stage

1.1. Overview of the training workshop and introduction to the training materials

LEG training workshops for 2012-2013
Anglophone African LDCs workshop
29 July – 2 August 2013, Kigali, Rwanda

In this module

Where are we?

Module 1: Setting the stage

- 1.1. Overview of the training and introduction to the training materials
- 1.3. Introduction to the LDC work programme, NAPAs, LEG, LDCF, and the NAP process
- 1.4. Addressing cc adaptation

Module 2: Implementation strategies for the NAPA

Module 3: Accessing financial resources for implementation of NAPA

Module 4: Tracking progress, monitoring and evaluation

Module 5: Best practices and lessons learned

Module 6: Mainstreaming adaptation into development

Module 7: The NAP process

=====

CASE STUDIES

Objectives

- a) To enhance the capacity of LDCs to implement NAPAs successfully;
- b) To enhance the capacity of LDCs to implement the other elements of the LDC work programme, other than the preparation and implementation of NAPAs
- c) To promote gender and other considerations regarding vulnerable communities in the design and implementation of adaptation projects.

Anglophone workshop 2009, Rep. of Tanzania

Objectives

- d) To enhance the capacity of LDCs to embark on the national adaptation plan (NAP) process building upon NAPAs;
- e) To enhance the capacity of LDCs to integrate their medium- and long-term adaptation needs into development planning
- f) To promote the exchange of information, best practices and lessons learned among the LDCs;

Approach and activities

- a) Presentations to guide the workshop (key topics and concepts, experiences from others, practical session outcomes, etc);
- b) Interactive exercises to facilitate discussions;
- c) Case studies of specific country experiences (e.g. on planning and implementing adaptation);
- d) Practical work sessions to discuss concepts introduced in the workshops;
- e) Field trip to exchange experience and discuss potential adaptation solutions (plans, strategies, projects, programmes, policies, etc.) with local communities on addressing climate change adaptation on the ground;
- f) Training of trainers.

Expected outcomes

All have acquired knowledge on:

- a) Different approaches, concepts, methods and tools for developing and successfully implementing NAPA projects;
- b) Practical issues to be taken into consideration for an effective process, at the national level, on identifying medium- and long-term adaptation needs, integrating them into development planning, and implementing identified adaptation activities;
- c) Practical methods, tools and information needs to effectively strengthen gender-related considerations and considerations regarding vulnerable communities in the design and implementation of adaptation activities;
- d) Experiences, best practices and lesson learned, at the regional level, on implementing adaptation through the NAPA process, and through other relevant processes;
- e) How to establish long-term NAP processes at national levels, stocktaking of available information, adaptation capacity gap analysis, approaches processes and options for data analysis, management and visualization, and support to the NAP process.

Topics to be covered

Module 1: Setting the stage

- 1.1. Overview of the training and introduction to training materials
- 1.2. Introduction to the LDC W/P, NAPAs, LEG, LDCF and NAP process
- 1.3. Addressing climate change adaptation

Module 2: Designing implementation strategies for the NAPA

- 2.1. Approaches and emerging trends for implementation of NAPAs
- 2.2. Success stories in designing implementation strategies
(experiences by countries)
- 2.3. Exploring synergies
- 2.4. Towards full implementation of the NAPA

Module 3: Accessing financial resources

- 3.1. Intro. to the GEF and the LDCF
 - 3.2. Formulating funding proposals
 - 3.3. PIF, PPG and CEO endorsement processes
 - 3.4. Adaptation cost and co-financing
 - 3.5. Latest developments on GEF-LDCF
 - 3.6. Accessing resources under the AF
-

Overview schedule

Module 4: Tracking progress, monitoring and evaluation

- 4.1. Assessment of the NAPA: progress, quality, revision and update
- 4.2. Tracking progress
- 4.3. Monitoring and evaluation
- 4.4. Communication strategy

Module 5: Best practices and lessons learned

- 5.1. Capturing and sharing best practices and lessons learned

Module 6: Mainstreaming adaptation into development

- 6.1. Climate change adaptation in the development context
- 6.2. Adaptation in the development context
- 6.3. National development processes
- 6.4. Integrating adaptation into development
- 6.5. Examples of adaptation activities

Module 7: The NAP process

- 7.1. Introducing the NAP process
- 7.2. Establishing the long-term NAP process at the national level
- 7.3. Stocktaking and synthesis of available information
- 7.4. Analysis of capacity needs and gaps and possible strategies to address them
- 7.5. Approaches, processes and options for data analysis, management and visualization
- 7.6. Potential support for the NAP process

Field trip

Field visit to nearby adaptation project sites in Rwanda:

- Participants to witness the key vulnerabilities facing Rwanda and some of the adaptation measures being put in place
- Participants to take the opportunity to interact with local communities and hear their experiences
