

SUBMISSION BY THE GOVERNMENT OF INDONESIA

Pursuant to the Decision 5/CP.23 on Warsaw International Mechanism for Loss and Damage associated with Climate Change Impacts, the Government of Indonesia would like to submit **views in the context of activity 1(a) of strategic work-stream (e) of the five-year rolling work-plan of the WIM Executive Committee as follows:**

The scope of technical paper on types and nature of actions which finance may be required to address loss and damage associated with climate change impacts should include:

1. Terms and definitions of loss and damage, including indicators of actions categorized to address loss and damage associated with climate change impacts from extreme events and slow onset events.
2. Development of technical instrument to identify potential loss and damage associated with climate change impacts.
3. Recommendations for the decision making process to address potential loss and damage associated with climate change impacts.
4. Capacity building and institutional strengthening including collecting best practises to cope with loss and damage associated with climate change impacts.
5. Development of technical instrument to identify distinction and linkages between loss and damage and the adaptation actions processes and implementation.
6. Quantifying economic and non-economic losses related to loss and damage associated with climate change impacts.
7. Clarity of institutional arrangements to support mobilization of financial support to address loss and damage, and the role of ExCom and existing financial mechanism under the Convention.
