

## M &E exercise : The way forward (road-map development)

---

### Context

- The practical development and implementation of an M&E system at national level will be confronted with various obstacles and imperfections

### Instructions: group work (20')

- Each corner of the room represents one of the following country categories: **coastal, land-locked, arid/semi-arid**
- Select a corner which represents the country you work with
- Reflect the actual situation in your country (use matrix): What is necessary to get successfully launched and implemented an M&E system development process?
- If you come from different countries, you might indicate in the matrix, for which country which statement is relevant.
- Develop a roadmap responding to various strategy dimensions for developing an M&E system.
- Select a person to briefly present the results in the plenary
