

Joint meeting Adaptation Committee and Least Developed Countries Expert Group

**Reporting back to plenary
Joint mandates**

Group 2: Methodologies to facilitate the mobilization of support

Bonn, Germany, 8 March 2017

Facilitator: Vosttha Wijenayake
Rapporteur: Aderito Santana, LEG

Draft recommendation 1

The AC and the LEG, **in collaboration with the SCF**, may wish to recommend the following to CMA:

- a) CMA to note that steps to facilitate the mobilization of support should reflect principles of country drivenness, equity, common but differentiated responsibilities and respective capabilities

No further action for refinement

Draft recommendation 2

- b) CMA to also note that effective mobilization of support, in particular financial support, for adaptation in developing countries involves a multitude of complementary approaches, including international bilateral and multilateral public support, domestic public support and private sector support;

Actions for refinement

- Spell out action needed at national vis-à-vis collective/international level
- Spell out multilateral public support, including how to mobilize such support
- Add more detail on how support is being provided

Draft recommendation 3

-
- c) CMA to invite Parties to make use of the variety of available methodologies, on taking the necessary steps to facilitate the mobilization of support for adaptation in developing countries and to report on support provided and received through their adaptation communications and other reporting mechanisms under the Convention and the Paris Agreement.

Actions for refinement

- Consider splitting recommendation into two (1. mobilization and 2. reporting)
 - Consider linking to table in the document and highlighting some methodologies included in section 4, e.g. how to assess adaptation support needs (links with other AC mandate) or how to prioritize and translate needs into priority projects?
 - Consider rephrasing “necessary steps” so as to not create impression of them being prerequisites and “creating enabling environment” possibly as basic conditions or building blocks
 - Be more specific on reporting mechanisms
 - Consider interrelationships between the three AC-LEG mandates, especially ensuring feedback from reviewing the adequacy and effectiveness of support
-
