

CONCEPT PAPER

Clearing house on Insurance and Risk Transfer

Members of Group of Champions: Australia, Bangladesh, European Union, Germany, Jamaica, Russian Federation, Timor-Leste

Coordinator: Germany

I. Introduction

The twenty-first Conference of Parties (COP) of the United Nations Framework Convention on Climate Change (UNFCCC), by its decision 1/CP.21, requested and thus mandated the Executive Committee (Excom) of the Warsaw International Mechanism (WIM) on Loss and Damage “*to establish a clearinghouse for risk transfer that serves as a repository for information on insurance and risk transfer, in order to facilitate the efforts of Parties to develop and implement comprehensive risk management strategies*”¹.

At the second meeting of the Excom (2-5 Feb 2016, Bonn/Germany), this request was considered, and an expert briefing as well as plenary and working group discussions took place on this topic. A “champions group” of Excom members volunteered to elaborate, intersessionally, on the output of the working group and to come up with suggestions for a road map for the establishment of a clearing house for risk transfer.² During the third Excom meeting (26-20 May 2016, Bonn/Germany) “Working Group 4 – Clearing House on risk transfer” of the Excom discussed the road map³ and decided on how to move forward intersessionally. The working group developed a first outline for a concept paper and an indicative timeframe for the following outputs: a final concept paper for the establishment of a clearing house for risk transfer, a mock-up power point (“look and feel”), an indicative implementation plan as well as an invitation letter and template for submissions by parties to assess needs.⁴

This paper presents the draft concept for the development of the clearing house. The annex contains an indicative implementation plan as well as an invitation letters and questionnaires for user needs assessments.

II. Objective

The objective of the clearing house is to serve as a repository for information on insurance and risk transfer that facilitates the efforts of Parties to develop and implement comprehensive risk management strategies. In order to have a catalytic effect in addressing loss and damage, this information needs to be demand driven and based on and linked to comprehensive risk management needs, incl. processes of risk reduction and adaptation strategies at regional and national levels.⁵

The initial two-year work plan prominently features the issues of comprehensive risk management and

risk transfer, in particular in Action Area (AA) 2 *"Enhance the understanding of, and promote, comprehensive risk management approaches"* and AA 7 *"Encourage comprehensive risk management by the diffusion of information related to financial instruments and tools that address the risks of loss and damage"*⁶.

III. Functions of the clearing house

Based on the objective described above, the clearing house should include the following three main functions⁷:

1. Enhance understanding, including
 - Managing (i.e. collecting, translating and sharing) existing information and knowledge
 - Enabling learning from good practices
 - Stimulating research into open questions and emerging issues
2. Improve policy coherence, including
 - Connecting important actors in the field of risk transfer and comprehensive risk management (as well as other relevant communities)
 - Supporting collaboration, networking and exchange amongst different stakeholders
 - Highlighting important topics and debates at different policy levels
3. Enhance action and support, including
 - Providing guidance on how to successfully set up and implement risk transfer solutions as part of comprehensive risk management approaches, e.g. by way of generic, step wise guidelines based on good practice
 - Disseminating tools and methodologies for e.g. risk/loss and damage assessments
 - Providing information on available technical support
 - Providing information on different types of funding for the implementation of climate risk insurance strategies
 - Facilitating information on financial support to assist Parties find the best insurance and risk transfer schemes to meet their circumstances
 - Facilitating information on financial support to assist Parties rehabilitate after the impacts of climate change disasters

IV. Users / audience

The target audience and the users of the clearing house are the Parties and thus public sector entities, i.e. governments and their ministries/departments at different levels that are involved in the development and implementation of risk transfer and comprehensive risk management strategies.

However, the information of the clearing house will be accessible without restriction or any sort of member privileges and therefore also be available to e.g. regional institutions, as collaborative entities of nation states, which often play a vital role in setting up risk transfer schemes.

V. Principles for design and maintenance

The design and maintenance of the clearing house will be informed by the following principles:

1. The risk transfer clearing house needs to be embedded in and serve the efforts of the WIM to address loss and damage using risk transfer mechanism in comprehensive risk management

⁶ See: Workplan of the Excom of the WIM: Available at:

http://unfccc.int/adaptation/workstreams/loss_and_damage/items/8805.php [01.02.2016].

⁷ Schäfer, Laura et. al.: "Form Follows Function – Designing a risk transfer clearing house", MCII 2016, Discussion paper for the Executive Committee of the WIM, p 13

approaches and its respective functions laid out in 2/CP.19.⁸ It thus needs to capitalise on the output of the Excom's initial two-year work plan, in particular of Action Area (AA) 2 (*Enhance the understanding of, and promote, comprehensive risk management approaches*) and AA 7 (*Encourage comprehensive risk management by the diffusion of information related to financial instruments and tools that address the risks of loss and damage*).⁹

2. Drawing from previous discussions during the Excom meeting and the examples of clearing houses in the UN context, the main vehicle for the clearing house will be an online platform.¹⁰
3. The clearing house follows a needs based approach. Representatives of the target audience, the users will be engaged in the design of the clearing house and its content in order to ensure usability of the information.¹¹ For this purpose the target audience, the users will be invited to answer to a needs assessment.
4. Creators and managers of other international clearing houses need to be consulted during the initial design phase in order to learn from their good practices and identify synergies.¹² Additionally, following the example of the UNFCCC web portal TT:CLEAR, the Climate Knowledge Brokers (CKB¹³) Group could be consulted during the design phase of the clearing house.
5. The clearing house will use – wherever possible and suitable – information, including on existing technical assistance, that is available from related climate information platforms and insurance initiatives, e.g. the G7 Initiative on Climate Risk Insurance “InsuResilience” and the Insurance Development Forum (IDF).
6. The clearing house will facilitate information on potential risk transfer and insurance facilities that are available, and on how vulnerable countries can gain access to insurance for addressing relief, rehabilitation and potential permanent losses with special attention given to the LDCs and SIDS regarding their special circumstances and capacities.

VI. Content

The clearing house will provide information in the following categories:

1. **Information on how to set up climate risk insurance schemes.** The clearing house will provide a generic, stepwise guidance for the user on how to develop and implement risk transfer and insurance solutions. This guidance will vary depending on the type of the insurance solution and the level of intervention, e.g. direct insurance approaches in which the insured beneficiary (e.g. a farmer) benefits directly from transferring risk to a risk-taking entity (such as an insurer) and indirect approaches where the final intended beneficiary benefits indirectly from payments intermediated by an insured government.
2. **Overview of existing insurance arrangements.** The clearing house will provide a structured and detailed overview of “who is doing what, where”. This information should include indirect insurance schemes such as the African Risk Capacity (ARC), Pacific Catastrophe Risk Assessment and Financing Initiative (PCRAFI) or the Caribbean Catastrophe Risk Insurance Facility (CCRIF) as well as direct insurance solutions (such as the R4 Rural Resilience Initiative). Case studies into success factors will provide valuable lessons for setting up risk

¹³ The CKB Group is a growing alliance of currently around 150 leading global, regional and national knowledge brokers specialising in climate and development information. See here:

<http://www.climateknowledgebrokers.net/online-climate-knowledge-sharing-clinics-unfccc-lessons-learned/>

transfer solutions. Users can be requested to provide such information for their country/region, including a description on the area and level of engagement.

3. **Information on how climate risk insurance can address rehabilitation and permanent losses and damages in vulnerable developing countries.** The clearing house will provide information on risk transfer and climate risk insurance mechanisms to address rehabilitation after disasters as well as addressing potential permanent losses and damage, including possible premium payments for the poorest and the most vulnerable developing countries.
4. **Risk information.** The online platform will provide and link to existing data and information where available and indicate data and information gaps. The data will either be incorporated via open data interfaces or linked to. Examples of existing databases and platforms are:
 - WBG Climate Change Knowledge Portal:
http://sdwebx.worldbank.org/climateportal/index.cfm?page=global_map
 - GCM Downscaled GCM Data Portal: <http://www.ccafs-climate.org/data/>
 - International Research Institute for Climate and Society Data Library:
<http://iridl.ldeo.columbia.edu/>
 - UNDP Climate Change Country Profiles:
<http://www.geog.ox.ac.uk/research/climate/projects/undp-cp/>
 - IPCC Data Distribution Center: <http://www.ipcc-data.org/>
5. **List of institutions working on the topic.** Information on relevant government organisations, insurance companies, research institutions, and other relevant stakeholders will be provided to facilitate communication between possible insurers and stakeholders for target countries. Countries will be requested to provide such information where lacking.
6. **Types of funding.** Different types of funding of the active schemes in the country and beyond will be presented (grant, technical assistance, financial assistance, loan, capitalization).

VII. Ways to present information

The online platform will have to present a lot of information in an accessible and understandable way while maintaining usability. Graphic elements will function as visual anchors and enhance the usability. Text blocks will be reduced to a minimum and will only be shown on user request (e.g. link for “more information”). A world map with “clickable” countries provides the relevant country/regional content. A filter enables users to create individual information output for relevant topics. The user needs assessment will support usability of the website by asking questions related to user friendliness and barriers to usability.

VIII. Technical considerations

tbd: hosting arrangement, building the clearing house (IT), ongoing content management (link management, updating content for relevancy, accuracy etc.)

IX. Budget

tbd

Annex I

Indicative implementation plan for the clearing house

During Excom III and indicative timeframe for the work of the group of champions and the Excom was developed to advance the development of the clearing house until COP 22 (see below).

Indicative timeframe until COP 22 (adjusted intersessionally by group of champions)

	Phase	Output	Timeframe	
1	Provide a basis for discussion <u>Intersessionally, a group would:</u> <ul style="list-style-type: none"> • Develop and finalize a concept paper • Develop and finalize a mock-up power point: <ul style="list-style-type: none"> ○ Content: Excom champions ○ Mock up look and feel: Secretariat • Develop a draft implementation plan • Develop a draft letter of invitation and suggestions for questions for a template for needs assessment submission • 	<ul style="list-style-type: none"> • Final draft concept paper • Draft mock-up power point • Draft letter and draft template for submission 	Until ExCom 4 tbc	May - Sep
2	Discuss, assess needs, learn lessons from other clearing houses <ul style="list-style-type: none"> • Discuss concept paper in plenary and mock-up power point • Discuss and finalize implementation plan • Discuss and finalize letter and template for submission • Define respondents for needs assessments • Learn lessons: Invite experts from other clearing houses, data platforms • Get input from experts 	<ul style="list-style-type: none"> • Final concept paper • Revised mock-up • Final implementation plan • Final letter and template for submission • 	During ExCom 4	19–23 Sep
3	Conduct needs assessment <ul style="list-style-type: none"> • Send out letters of invitation and questionnaires to UNFCCC focal points and selected institutions 		Until COP 22	Sep-Nov

The **indicative implementation plan (after COP22)** for the establishment of the clearing house displayed in the table below:

Action	Tasks involved	Date
	Coordination: Group of Champions (incl. insurance experts) and Secretariat (incl. IT department)	
Consolidate needs and business requirements for the system development	<ul style="list-style-type: none"> • Consolidation of needs assessment results (by Secretariat). • Analysis of needs assessment results to inform next steps including business requirements (by insurance expert as part of Group of Champions) • Draft requirements (content management system, design, hosting, etc.) for a clearing house on basis of identified needs submitted to Excom (by Secretariat) 	Until Excom V
Consider analysis and draft business requirements	<ul style="list-style-type: none"> • Draft requirements reviewed by Excom 	Excom V

	<ul style="list-style-type: none"> • Group of Champions/Working Group to incorporate feedback • Define next steps, such as design, content needs, hosting, publicity • Identify and reach out to potential partners 	
Coordination between Secretariat and Group of Champions	<ul style="list-style-type: none"> • Secretariat seeks input and direction from Group of Champions as needed 	Intersessionally between Excom V and VI
Initial clearing house design and decision on content , and funding to secretariat and or partnerships tbd.	<ul style="list-style-type: none"> • Initial design of clearing house including indicative functions and sample presented and agreed • Excom agrees call for provision of content • Funding for Secretariat and / or Partnerships to be confirmed 	Excom VI
Prepare the operational version of clearing house design including content	<ul style="list-style-type: none"> • Operational version of clearing house prepared • Feedback by group of champions • Feedback by selected users and institutions as required (identified based on needs assessment) • Feedback incorporated to prepare beta site to be approved by the Group of Champions • Establish a Steering group for the clearing house incl. Secretariat, Excom, Partners 	Intersessionally between Excom VI and VII
Launch of beta site clearing house at COP 23 (latest)		COP 23

Annex II

Letter and questionnaire for user needs assessment with selected institutions

[Insert name of institution]

Dear [Insert Name],

The Executive Committee of the Warsaw International Mechanism for Loss and Damage (Excom) is seeking input from potential users on the content, design, and use of the clearing house for risk transfer as mandated in 1/CP.21. If you or someone else from your institution would like to participate in this process, please complete the attached information sheet and return to loss-damage@unfccc.int.

At the nineteenth session the Conference of Parties (COP) under the United Nations Framework Convention on Climate Change established the Warsaw International Mechanism (WIM) on Loss and Damage to address adverse effects of climate change through its three main functions: enhancing knowledge and understanding of comprehensive risk management approaches; strengthening dialogue, coordination, coherence and synergies among relevant stakeholders; and enhancing action and support, including finance, technology and capacity building.

The COP by its decision 1/CP.21, requested the Executive Committee (Excom) of the WIM under the paragraph 48 “to establish a clearing house for risk transfer that serves as a repository for information on insurance and risk transfer, in order to facilitate the efforts of Parties to develop and implement comprehensive risk management strategies”.

Drawing from discussions with experts during Excom meetings and examples of clearing houses in the international context, the main vehicle for the clearing house will be an online platform. Potential users of the clearing house as well as institutions involved in the development of risk transfer and insurance solutions are encouraged to contribute to the design of this platform to ensure applicability and usability of the information provided.

On behalf of the Excom of the WIM, we thank you for your consideration of this request. We are happy to answer any questions you may have considering this invitation and look forward to receiving your response by [date] to loss-damage@unfccc.int.
