

Indicators on Capacity Building for Adaptation

Nicolina Lamhauge
OECD Environment Directorate

Categories of adaptation activities

Type of activity

Climate risk reduction

Policy and administrative management for climate change

Education, training and awareness on climate change

Climate scenario and impact research

Co-ordination on climate change measures and activities across relevant actors

Examples of indicators

Indicators on capacity building for adaptation

No. of training sessions/workshops conducted

No. of people trained

No. of stakeholders participating in training /knowledge sharing

No. of trained committees that develop and adopt risk reduction plans

Increased community capacity as a result of the programme

Development of knowledge platform

No. of visits on web-based platform

The use of indicators

- Comprehensive Disaster Management Programme, Bangladesh (2004-9)
 - 300 Disaster Management Committees trained across 7 districts
 - 80% of the trained Disaster Management Committees developed and adopted their risk reduction plans by December 2008
- Regional Climate Change Programme, Southern Africa (2009-14)
 - No. of policy makers that demand and use the information
 - At least 3 regional advocacy groups have the capacity (with programme support) to respond to climate change

Thank you!
