

Daouda Ndiaye
Secretariat of the Adaptation Fund Board

Daouda Ndiaye, a Senegalese national, is an Adaptation Officer at the Adaptation Fund Board Secretariat, which he joined in November 2010. His main responsibilities include the review of projects and programme proposals and monitoring of the Fund portfolio, as well as support the Board in the preparation of policy and strategic documents of the Adaptation Fund.

Prior to this position, Mr. Ndiaye worked for three years in the Environment & Energy Unit of the UN Development Program's regional centre in Dakar, covering Western and Central Africa. His main responsibility was to provide support to UNDP country offices in mobilizing funds from the Global Environment Facility, designing and supervising the implementation of biodiversity and land degradation projects.

Prior to that, he worked for one year at the Ecological Monitoring Centre in Dakar, Senegal, as an expert and research officer in soil carbon sequestration, agriculture, and land degradation.

Mr. Ndiaye has seven years of experience in the design, implementation and management of environmental research projects dealing with the biological regulation of atmospheric greenhouse gas concentrations both in Senegal and the US, including a three-year research associate position at the University of Louisville in Kentucky. He has authored several scientific publications and communications on the topic.

Mr. Ndiaye holds a PhD in Ecology from the University Pierre et Marie Curie (Paris VI) and a master's degree in Business Administration from the University of Bourgogne in France.
