

Marigold Norman

Marigold Norman is a Senior Research Officer at the Overseas Development Institute with more than 8 years of experience working on climate change and environment issues, as a researcher, policy advisor and programme manager.

At ODI, Marigold works on research issues relating to climate finance effectiveness, forestry, agriculture and land use financing with publications including the State of REDD+ Finance, Climate Finance: Is it making a difference? as well as forthcoming publications Demystifying Private Finance for REDD+ and Food and Agriculture in a Changing Climate. Marigold has also worked on climate fund evaluations including a progress review of the International Fund for Agricultural Development's Adaptation for Smallholder Agriculture Programme.

Marigold's previous experience includes policy advisor for the UK Department for the Environment, Food and Rural Affairs supporting the UK's forest governance and trade agenda as well as leading a research project on the state of REDD+ finance for the Washington DC non-profit, Forest Trends.

Marigold holds a Master of Science degree in Geography from the University of Wisconsin-Madison in the US, and a Bachelor degree from the University of Cambridge in the UK.
