

Report-back from breakout group 3

Key issues discussed

- a) Ability to assess vulnerabilities to develop bankable projects (informs bankability of projects)
- b) Clear articulation of actual projects to put money on the table
- c) Adaptation: hardware and software adaptation
 - INDCs are a good foundation for outlining needs
 - National climate change finance assessment (the example of the Pacific); regional templates
- d) Big challenge is to institutionalize.
- e) Having these concrete instruments is useful for both sides (donors and recipients)
- f) Incorporating gender and social inclusiveness into NDCs and other instruments
 - Gender considerations as funding requirements
- g) Private sector investment for adaptation
 - Long-term horizon; Size of projects – scaling up
 - Dealing with private sector or other jurisdictions with different jurisprudence is a challenge
- h) Quantifying the adaptation project is a challenge

Report-back from breakout group 3

Actions / Next steps

- Institutionalization of needs
- Support for quantifying needs
- Having regional templates
- Information sharing (best practices in different regions)
- Adaptation
- Engaging private sector
