

WHAT IS OUR THINKING ON IMPLEMENTATION OF OUR Technology Action Plan (TAP)

- The development of the TNA of The Gambia is based on consultations with all key stakeholders and institutions and strategic frameworks dealing with implementation of climate change;
- These strategic frameworks and processes include the NDC, NAPs, the Gambia Strategic Programme for Climate Resilience (SPCR) and the proposed Low Emissions Climate Resilient Development Strategy (LECRDS)
- The TNA process and the implementation of the National TAP will be fully integrated with other mitigation and adaptation processes such as the NDC and NAPs;
- This will allow the TAPs to serve as platforms for taking forward the implementation of NDCs and NAPs.
