

UNFCCC Webinar: Views on the design of the in-session workshop(s) on long-term climate finance in 2014

This webinar will provide the opportunity to Parties and observers to discuss modalities, focus and expected outputs in 2014.

Specifically, the webinar will address the following questions:

- **What would be the focus areas of the in-session workshop(s), including themes;**
- **The format and the flow of the in-session workshop(s)**

Thematic area 1: Approaches and strategies for mobilizing scaled-up climate finance from 2014 to 2020, which would address the types of information listed in decision 3/CP.19:

Thematic area 2: Cooperation on enhanced enabling environments and support for readiness activities, which could be further structured around the following themes:

Thematic area 3: Needs for support to developing countries

Thematic area 1: Approaches and strategies for mobilizing scaled-up climate finance from 2014 to 2020, which would address the types of information listed in decision 3/CP.19:

- Information to increase clarity on the expected levels of climate finance mobilized from different sources;
- Information on their policies, programmes and priorities;
- Information on actions and plans to mobilize additional finance;
- Information on how Parties are ensuring the balance between adaptation and mitigation, in particular the needs of developing countries that are particularly vulnerable to the adverse effects of climate change;
- Information on steps taken to enhance their enabling environments, following on from the report of the co-chairs of the extended work programme on long-term finance

Thematic area 2: Cooperation on enhanced enabling environments and support for readiness activities, which could be further structured around the following themes:

- Policy and regulatory measures that incentivize and promote the alignment of long-term private sector finance and investments with developed country Parties approaches and strategies for scaling up climate finance and support to developing country Parties and climate change policies of developing country Parties;
 - Collaborative efforts at multilateral and bilateral levels that seek to address barriers to scaled-up climate finance from public and private sources and that support developing country Parties' mitigation and adaptation needs and priorities; and
 - Emerging insights from developed-developing country collaborations and on-going readiness activities across the Convention.
-

Thematic area 3: Needs for support to developing countries

- Lessons learned from various approaches and methodologies used to measure adaptation and mitigation needs of developing country Parties;
- Insights from the ongoing work under the Convention in the area of adaptation and mitigation needs of developing countries, following the conduct of National Economic, Environment and Development Study (NEEDS) for Climate Change Project of UNFCCC in 2010
- How adaptation and mitigation needs can most effectively be met by climate finance flows, in particular the needs of developing countries that are particularly vulnerable to the adverse effects of climate change
