

NAMA Seeking Support for Implementation

A.1 Party	Chile
A.2 Title of Mitigation Action	Implementation of a National Forestry and Climate Change Strategy, including the development and implementation of a Platform for the Generation and Trading of Forest Carbon Credits.
A.3 Description of mitigation action	This NAMA aims to advance the implementation of the country's Platform for the Generation and Trading of Forest Carbon Credits (PBCCh). This NAMA includes the development of pilot sites that will be established in different types of forests and lands suitable to forestation. These pilot units will be the first to generate units for trading under the PBCCh. These pilots will include improvements in land titling processes, the identification and implementation of more appropriate forest management techniques, the generation of sub-national reference levels and MRV systems, among others issues related to forestry carbon projects.
A.4 Sector	<input type="checkbox"/> Energy supply <input type="checkbox"/> Residential and Commercial buildings <input type="checkbox"/> Agriculture <input type="checkbox"/> Waste management <input type="checkbox"/> Transport and its Infrastructure <input type="checkbox"/> Industry <input checked="" type="checkbox"/> Forestry
A.5 Technology	<input type="checkbox"/> Bioenergy <input type="checkbox"/> Energy Efficiency <input type="checkbox"/> Hydropower <input type="checkbox"/> Wind energy <input type="checkbox"/> Carbon Capture and Storage <input type="checkbox"/> Cleaner Fuels <input type="checkbox"/> Geothermal energy <input type="checkbox"/> Solar energy <input type="checkbox"/> Ocean energy <input checked="" type="checkbox"/> Other Aforestation/reforestation
A.6 Type of action	<input type="checkbox"/> National/ Sectoral goal <input type="checkbox"/> Strategy <input checked="" type="checkbox"/> National/Sectoral policy or program <input type="checkbox"/> Project: Investment in machinery <input type="checkbox"/> Project: Investment in infrastructure <input type="checkbox"/> Other:
B National Implementing Entity	
B.1 Name	The Ministry of Agriculture's National Forestry Corporation (CONAF)
B.2.1 Contact Person	Angelo Sartori Ruilova
B.2.2 Address	Paseo Bulnes 259, Of. 603
B.2.3 Phone	56-2-6630324
B.2.4 Email	angelo.sartori@conaf.cl

B.3.1 Contact Person	Aida Baldini	
	(alternative Contact Person 1)	
B.3.2 Address	Paseo Bulnes 259, Of. 603	
B.3.3 Phone	56-2-6630249	
B.3.4 Email	aida.baldini@conaf.cl	
B.4.1 Contact Person	<Pls enter name of Contact Person here>	
	(alternative Contact Person 2)	
B.4.2 Address	<Pls enter Address here>	
B.4.3 Phone	<Pls enter Phone Number here>	
B.4.4 Email	<Pls enter Email Address here>	
C. Expected timeframe for the implementation of the mitigation action		
C.1 Number of years for completion		4
C.2 Expected start year of implementation	2013	
D.1 Used Currency	million of US\$	
E Cost		
E.1 Estimated full cost of implementation		22.80
E.2 Estimated incremental cost of implementation		14.40
F Support required for the implementation of the mitigation action		
F.1.1 Amount of financial support	7.75	
F.1.2 Type of required financial support	<input type="checkbox"/> Loan (sovereign) <input type="checkbox"/> Loan (Private) <input type="checkbox"/> Concessional loan <input type="checkbox"/> Debt Swap <input checked="" type="checkbox"/> Grant <input type="checkbox"/> Equity <input type="checkbox"/> Guarantee <input type="checkbox"/> Carbon finance <input type="checkbox"/> FDI <input type="checkbox"/> Others:<Pls enter Other text here>	
F.1.3 Comments on Financial Support	<p>CONAF has estimated a total cost of 22.8 million USD for the implementation of the National Forestry and Climate Change Strategy, including the Platform for the Generation and Trading of Forest Carbon Credits. Of this amount, the Chilean Government is committed to contributing 8.4 million USD. Of the 14.4 million needed in incremental costs of implementation, CONAF is already developing individual agreements with the World Bank (through the Forest Carbon Partnership Facility) and the Swiss Government for approximately 6.65 million USD of support. This being the case, the amount of financial support that Chile is requesting through the NAMA Registry for this NAMA is</p>	

7.75 million USD in grants. In total, these various sources would cover the total cost of implementation of the National Strategy.

F.2.1 Amount of Technological Support	0.00	
F.2.2 Comments on Technological Support	N/A	
F.3.1 Amount of capacity building support	0.00	<input type="checkbox"/> \$ (Dollars) <input type="checkbox"/> man/hours
F.3.2 Type of required capacity building support		<input type="checkbox"/> Institutional development <input type="checkbox"/> Human capital <input type="checkbox"/> Systemic (policies, legislative, regulatory, etc)
F.3.3 Comments on Capacity Building Support	N/A	

G Estimated emission reductions

G.1 Amount 42.00

G.2 Unit MtCO₂e

G.3 Additional information (e.g. if available, information on the methodological approach followed):
CONAF estimates that the total cumulative capture of emissions that will result from the full implementation of the National Forestry and Climate Change Strategy from 2013 to 2020 will be approximately 42 Mt CO₂e. The implementation of this Strategy includes the development and implementation of the Platform for the Generation and Trading of Forest Carbon Credits in Chile. It is possible that some of the carbon credits generated and traded under the (PBCCh) will be sold internationally, which will be accounted for in Chile's national pledge from here to 2020.

H.1 Other indicators of implementation The National Strategy has been developed by a wide range of experts from Chile, Switzerland, the World Bank and another Chilean Ministries and international support agencies. The Strategy is also interlinked with with the REDD+ Chilean proposal to the FCPF, where social and environmental safeguards are being fully considered. The MRV system being developed for the National Strategy will also include indicators related to biodiversity, gender equality, adaptations issues, among others.

I.1 Other relevant information including benefits for local sustainable development

Through the implementation of this NAMA, the Government of Chile will be facilitating the creation of an economic alternative for owners of degraded land, mainly small and medium-size ones, which in turn will result in a new impetus to the forestry activity in the country, thereby increasing rates of afforestation and restoration of natural forests due to a greater economic expectation of owners based on this new commercial option. At the same time, the establishment and enhancement of forest resources in the country will result in the generation of an environmental asset that will be a key part of the national strategies of mitigation of GHG emissions. The implementation of this NAMA will also serve to lower the financial barriers

faced by owners who wish to participate in the forestry business in general and in carbon markets.
