

**Event on quantified economy-wide emission reduction targets
by developed country Parties
(6 June 2013)**

Draft Agenda

Opening (15.00-15.25)

- Opening remarks by SBSTA Chair (Mr. Richard Muyungi)
- Presentation by the secretariat on the technical paper (Ms. Barbara Muik)
 - *Questions and answers*

Session 1. Measuring progress towards achievement of targets (15.25-16:35)

- Technical briefings (Ms. Kelly Levin (WRI), Mr. Andrew Prag (OECD))
 - *Questions and answers*
- Interactive discussion moderated by the SBSTA Chair
 - *Interventions from the floor*

Session 2. Comparability of mitigation efforts and assumptions and conditions related to the targets (16:35-17:45)

- Technical briefing (Mr. Martin Khor (South Centre))
 - *Questions and answers*
- Interactive discussion moderated by the SBSTA Chair
 - *Interventions from the floor*

Concluding remarks by SBSTA chair (17:45-18:00)

Questions for discussion

Session 1. Measuring progress towards achievement of targets

- Is sufficient and comparable information from all developed country Parties available to identify an initial set of common elements for measuring the progress? If not, what additional information is needed and how should it be provided?
- How could the initial set of common elements facilitate comparability of mitigation efforts?
- How could work of this and other observer organizations be of relevance for developed country Parties to measure the progress towards their targets?
- What could be the next steps to identify common elements for measuring the progress made towards the achievement of the targets?

Session 2. Comparability of mitigation efforts and assumptions and conditions related to the targets

- Is there any new information regarding clarification and review of assumptions and conditions related to targets of developed country Parties?
- Is further clarity needed on the contribution of domestic mitigation action, the LULUCF sector and international transactions of carbon credits from market-based mechanisms to ensure comparability? If yes, what additional information is needed?

- How could work of this and other observer organizations be of relevance for enhancing the understanding of the comparability of mitigation efforts and assumptions and conditions related to the targets?
- What could be the next steps to enhance the understanding of the targets and ensure the comparability of mitigation efforts by developed country Parties?
