

UN REDD

a collaborative programme of UN agencies on Reducing Emissions from Deforestation and Forest Degradation to support developing countries

FAO-UNDP-UNEP

June 2008

UN REDD

A response to Bali Decision 2/CP.13

Coalition for Rainforest Nations and donor requests for joint UN action

To support country-led, integrated REDD programmes

To facilitate the informed involvement of national stakeholders, including forest-dependent local communities

To coordinate with other players including WB FCPF, GEF, etc. on making REDD work for people

Increase UN effectiveness - "Delivering as One UN"

UN REDD Collaborative Programme

Rationale

To assist forested developing countries and help to facilitate international cooperation on various methodologies, risk management formulae, payment structures and support to the UNFCCC process.

Components

- Country Actions
- International Support

Institutional Arrangements

Multi-donor Trust Fund pass through mechanism

Country-driven “Joint Programmes”

Supporting cross-sectoral responses and stakeholder participation

Utilising the UN Country Team mechanisms

Building on comparative advantages of FAO, UNDP and UNEP and to include partners

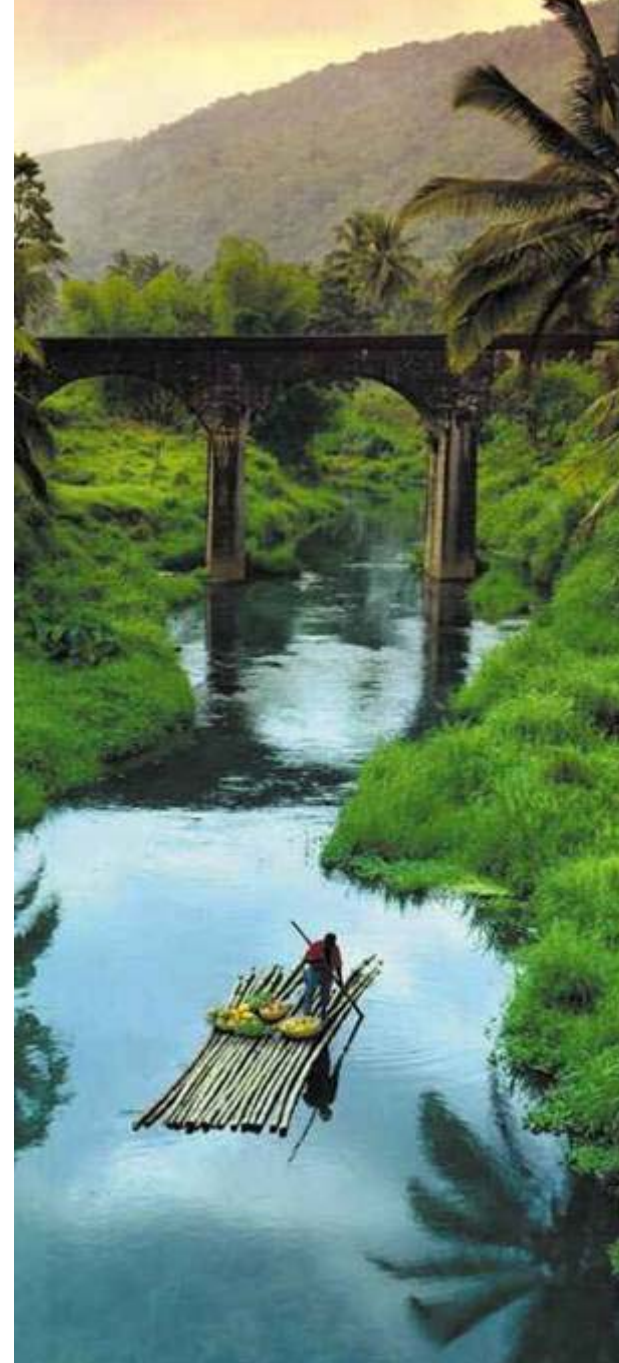

Country Actions

Will be identified and led by the government

Will vary from country to country

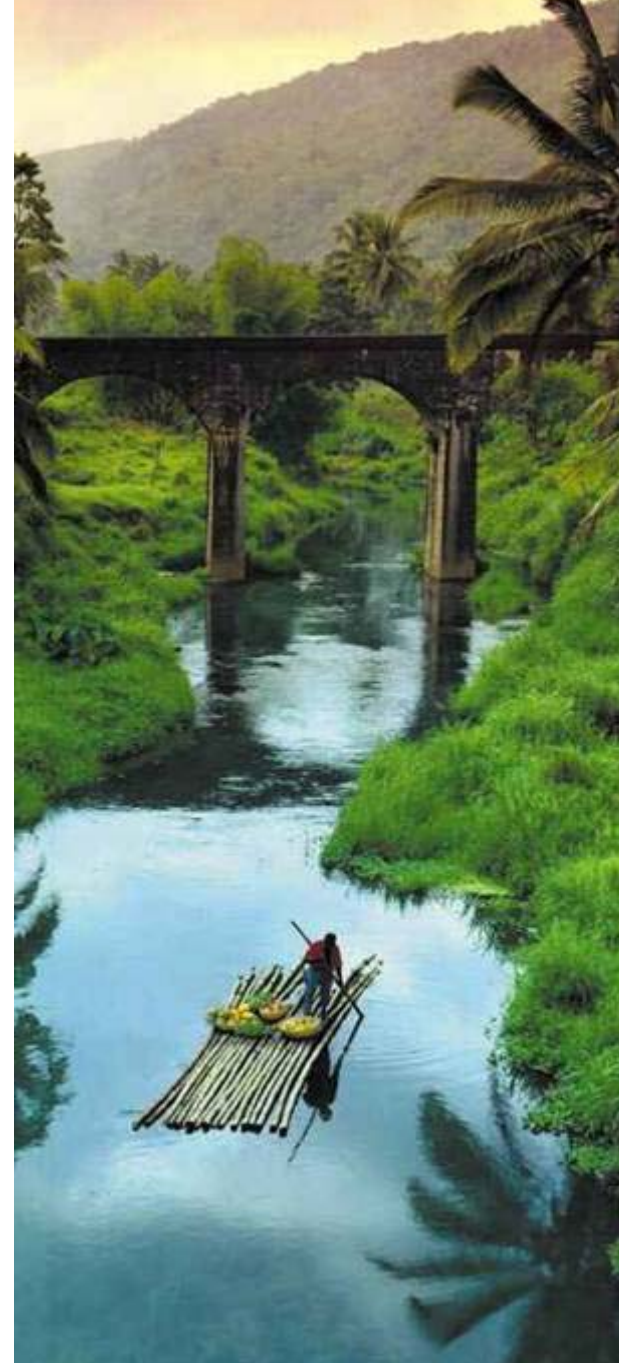

Aim to establish cross-sectoral & multi-stakeholder responses

Aim to facilitate & support the challenging national processes in which REDD actions are defined and agreed

Indicative Country Actions

- Scoping and Alliance Building
- REDD Readiness for Monitoring and Assessment
- REDD Dialogue
- National REDD Strategy
- Support for implementing the REDD measures
- REDD Data Management
- REDD Payment Distribution
- REDD Payment Structuring

Country Actions

Scoping and Alliance Building

**REDD Readiness for Monitoring
and Assessment** 

REDD Dialogue

National REDD strategy

Support for implementing the
REDD measures

REDD Data Management

REDD Payment Distribution

REDD Payment structuring

- Assistance to establish baseline and reference scenarios
- Implementation of national forest monitoring and reporting systems
- Development of a verification system
- Capacity-building on application of IPCC and other relevant guidelines

Country Actions

Scoping and Alliance Building
REDD Readiness for Monitoring
and Assessment

REDD Dialogue

National REDD strategy
Support for implementing the
REDD measures
REDD Data Management
REDD Payment Distribution
REDD Payment structuring

- Consultation and awareness with resource owners, groups with traditional rights, and economic agents
- Participatory REDD payment distribution structures, especially at indigenous peoples and local community level
- Building national support and cross-sectoral action

Country Actions

Scoping and Alliance Building
REDD Readiness for Monitoring
and Assessment
REDD Dialogue
National REDD strategy
Support for implementing the
REDD measures
REDD Data Management
REDD Payment Distribution →
REDD Payment structuring

- Design of pro-poor performance–orientated transfers
- Direct payments to individuals where rights are clearly established
- Indirect payments to improve development service delivery

International Support

Technical and Scientific:

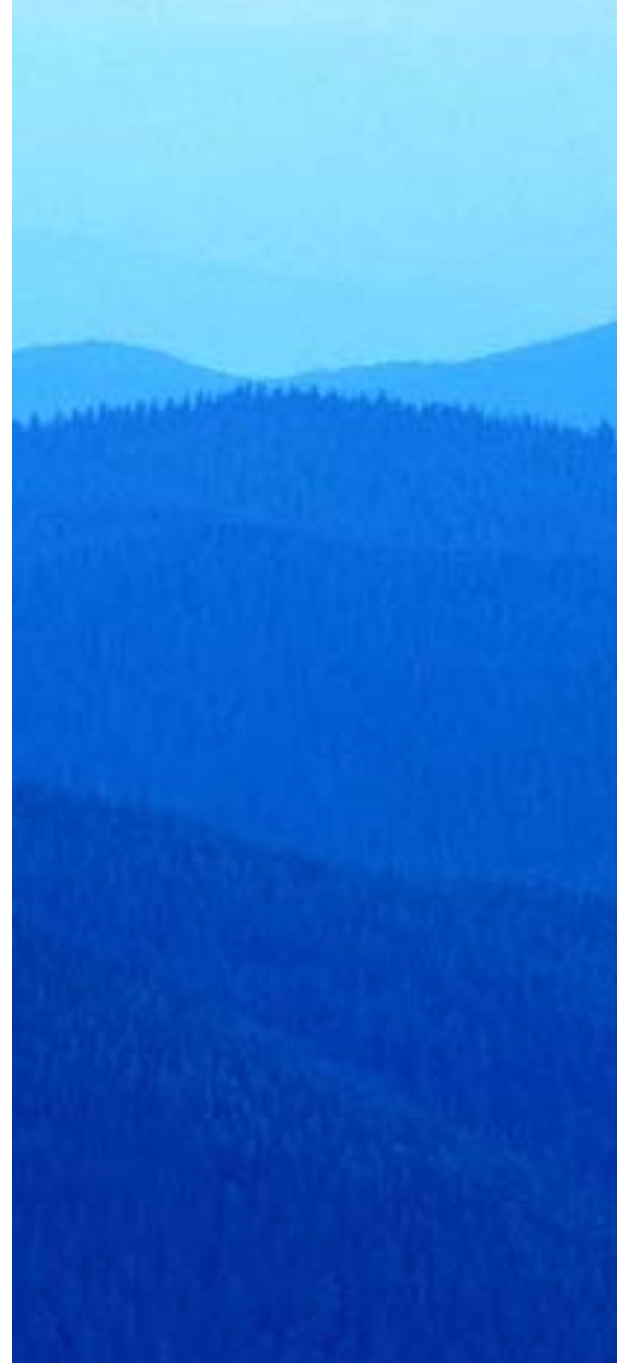

Monitoring systems

Accounting Methods and
Verification of Reduced
Emissions

Guidelines, methods and tools for
REDD

Co-benefit and Trade-Off Tools

Capacity building in design,
negotiation and implementation

International Support

Knowledge Management:

Knowledge Sharing Between
Countries

REDD Awareness

Data availability and
interpretation

Cutting edge science and policy
networks
