RE:  
New projected net-emission value in the Submission of information on forest management reference levels by Slovakia

Dear Sirs,

Slovakia has provided to the secretariat of UNFCCC the Submission of information on forest management reference levels on 18 April 2011 (Ref: 3537/2011-4.3).

Due to minor error in the calculation matrix of the HWP model, which affects the result of the projected net-emission numbers, **we would like to inform you that the HWP value for Slovakia should be changed from -1,415 Mt CO<sub>2</sub> to the new projected net-emission value of -1,442 Mt CO<sub>2</sub>.**

Please take this information fully in consideration.

Sincerely yours,

Helena Princová  
National Focal Point to the UNFCCC  
Ministry of Environment
