

Work on the AWG-LCA Revised Negotiating Text  
Intersessional informal consultations

**Sections B and F of chapter II ‘Enhanced action on adaptation and its means of implementation’ (Pages 37-46, 66-67) of the Annex to FCCC/AWGLCA/2009/INF.1<sup>1</sup>**

**Informal group  
Adaptation  
14 August, 3pm**

**B. Implementation [of adaptation action]**

*[[Enabling [activities] [environments]] [International cooperation and support] to support adaptation action]*

23. [With a view to promoting adaptation planning] [all] Parties should:
- (a) Implement planning that is multi-sectoral, includes prioritization of adaptation actions, gives priority to the most vulnerable, and makes use of the best available scientific information and analytical tools;
  - (b) Promote climate-resilient development in a manner that is practical, informed by the best science, environmentally sound, and economically efficient, and that promotes on-the-ground results;
  - (c) Identify, on a continuous basis, their country-specific adaptation needs, options and priorities, taking into account their existing capacities and past and current adaptation activities;
  - (d) Prioritize the needs and specific circumstances of the poorest and most vulnerable people and indigenous groups in planning and development processes at the local, sectoral and national levels.]
24. [[All] [Parties] [All developing country Parties [particularly low-lying and other small island countries, countries with low-lying coastal, arid and semi-arid areas or areas liable to floods, drought and desertification, and developing countries with fragile mountainous ecosystems]] [Particularly vulnerable developing country Parties] [LDCs and SIDS] [with financial support from the Convention Adaptation Fund, technical support and capacity-building] [shall] [should] [may] [on voluntary bases] [formulate] [develop] [[periodically] update] [review] [and report on] [and make available to the Conference of the Parties] [their] [national [and/or thematic areas,] adaptation plans [and their implementation]] [national adaptation planning] [national adaptation programme of actions (NAPAs)] [national action programs on adaptation] [within [X] years], [through] [inter alia] [as a means of] assessing [current and potential impacts of climate change] [and developing strategies to reduce these impacts through the implementation of adaptation action], identifying, costing and prioritizing their urgent and immediate, and medium and long-term, adaptation [actions and] needs, including needs related to risk management, reduction and [sharing], [that are consistent with] [on the basis of] national [and sectoral] priorities [and strategies].

---

<sup>1</sup> The text below reflects progress in the consolidation efforts undertaken by the Co-facilitators of the informal group on adaptation during the August informal consultations.

[National adaptation plans may be developed and implemented at different time scales depending upon national circumstances.]

25. [Developing countries that are particularly vulnerable to the adverse effects of climate change, especially the least developed countries and small island developing States, and further taking into account the needs of countries in Africa affected by drought, desertification and floods, shall be provided with financial and technical assistance to develop and implement national adaptation plans.] [Adequate finance must be provided for the implementation of NAPAs. In addition, finance must be provided to all developing country Parties to enable the formulation of their national adaptation plans.] [Parties should commit to promote adaptation to climate change by cooperating to build capacities and mobilize resources for the development and implementation of such programs, in particular for the least developed countries.]

26. [These plans [should] [could] [be a component of low emission development strategies and]:]

- (a) [[Catalyse] [Support] actions [in and across different sectors], promoting efficient [and effective] use of the financial resources for adaptation provided by developed country Parties under the Convention;]
- (b) Indicate areas of immediate action and support in terms of means of implementation;
- (c) [Emphasize [programmatic approaches], while also recognizing a place for adaptation projects [under certain circumstances];]
- (d) [Inform domestic action and the [provision] [allocation] of increased international financial support, possibly forming a component of a country's sustainable development plan;]
- (e) [Be used to report on the effectiveness of adaptation actions in meeting stated objectives;]
- (f) [[Consider the synergy between and the multiple benefits of adaptation and mitigation measures, including those within which options concerning reducing emissions from deforestation and forest degradation in developing countries (REDD) are particularly relevant;] [Indicate, where possible, potential synergies between adaptation and mitigation measures, and indicate if the adaptation actions may have positive or negative consequences on mitigation;]]
- (g) [Take into account [the dynamics of natural systems] [natural systems and their dynamics] [the composition, resilience and productivity of natural and managed ecosystems, and the support they provide to adaptation];]
- (h) [Verb missing] Impact assessment of actions undertaken in the context of shared and trans-boundary resources;
- (i) Take into account relevant social and economic conditions, which should be consistently defined and include gender considerations in order to enhance women's capacity to act and to contribute to adaptation actions effectively.
- (j) Integrate a gender perspective and community-based and participatory approach to adaptation;
- (k) Take into account land degradation.

27. [National adaptation plans [should] [could] include [at least][, inter alia]:

- (a) Vulnerability assessments;
- (b) Prioritization of actions;

- (c) [Financial needs assessments;]
- (d) Capacity-building [and response] strategies;
- (e) Means for integrating adaptation actions into [thematic areas] [sectoral] and national planning;
- (f) Identification of specific projects and programmes;
- (g) Identification of means to incentivise the implementation of adaptation actions;
- (h) [Ways to enable climate-resilient development and reduce vulnerability;]
- (i) Disaster risk [[reduction] and] management strategies;
- (j) [Means to diversify the economy as an adaptation strategy].]

28. [National adaptation planning procedures should build on existing processes and methodologies where available and appropriate, such as national communications, national adaptation plans of action, and technology needs assessments.]

29. [National adaptation plans [are to be] [should be] [reviewed and] updated [every [three to] four years] [with financial support from the Convention Adaptation Fund]. [Implementation of] national [adaptation plans [and actions]] [adaptation planning processes] [should be ongoing and iterative, and activities] [should be] [could be] [reported] [included] as part of a country's national communication.] The developed country Parties shall provide new and additional financial resources – above what is now provided for national communications – to meet the agreed full costs incurred by developing country Parties in compliance with their obligations under Articles 12, paragraph 1, and 4, paragraph 3, of the Convention.

30. [[Adequate predictable and sustainable finance [[must be provided to promote enabling activities to support adaptation action and implementation.] [To promote [[the] enabling [activities] [environments] [(policy, legislative and institutional)] to support] [, enable and support the implementation of] adaptation action[s], [all Parties] [Parties] [all developing country Parties [particularly low- lying and other small island countries, countries with low- lying coastal, arid and semi- arid areas or areas liable to floods, drought and desertification, and developing countries with fragile mountainous ecosystems]] [with financial support from the Convention Adaptation Fund, technical support and capacity-building] [shall][should][may]:] [To promote the enabling activities to enhance adaptation actions in all developing country Parties, the developed country Parties should]:]

- (a) [Provide support to developing country Parties for] [Promote] the integration of [Integrate] adaptation [concerns] into [national, subnational, and sectoral] [sustainable] development [policies and strategies] [programmes and priorities] [planning processes], disaster risk [Coordinate adaptation and disaster risk reduction and integrate these into development] and poverty reduction plans, [public policies] strategies, tools and policies [at multiple levels] [at the local, national, regional and international levels] [and across sectors], [developing national adaptation plans as appropriate, and reviewing and reporting on these activities]; recognizing that climate change is an additional burden to development;]
- (b) Integrate sustainable development into economic diversification strategies;
- (c) [Minimize incentives that encourage maladaptation] [Provide incentives to adaptation through [inter alia] [regulatory policies], legislative changes, removal of barriers, [involving women as active participants,] and other supportive approaches;]
- (d) Build resilience to climate variability and change into economic development activities and institutions;

- (e) [Provide technical support to developing country Parties to] [Undertake [sound] [impact] vulnerability and adaptation assessments, including [costs and benefits] [those at the local, national and regional levels, employing a range of decision-making tools and methodologies] [Identify major vulnerabilities to climate change];]
- (f) [Support capacity-building efforts] [Provide financial and technical support to building capacity, including institutional capacity in developing country Parties] [Promote local and needs-oriented capacity-building activities for adaptation at all levels, including through specific targeted training and technical support] [Build capacity, including institutional capacity [, through providing financial [and technical support]]] [resources and technology development and transfer] for:
  - (i) [Operational planning of adaptation, including for detailed project design, costing of adaptation, [implementation of adaptation actions] and increasing adaptive capacity;]
  - (ii) [Systematic observation, data collection and archiving, analysis, modelling [and] dissemination and application;]
  - (iii) Applying climatic information in sectoral planning as well as in cross-sectoral planning such as integrated water resources management;
  - (iv) Running and interpreting complex models;
  - (v) Improved emergency response capabilities, including governance structures that encourage efficient use and coordination of local, national and international resources;
  - (vi) Analysing institutional vulnerabilities in developing countries in order to build national capacities in specialized areas, such as modelling, adaptation planning and implementation, and strengthen the relevant institutional capacities;
- (g) [[Engage in] [Enhance] education and training programmes, research and public awareness-raising; [including public and stakeholders education and continued outreach];]
- (h) [Share knowledge, information [, data] and experience [including utilizing the services of relevant institutions] at [local, national,] regional and international levels, consistent with international agreements;]
- (i) [Support the supply and availability of adaptation technologies, climate information (including through research and systematic observation), tools, methods and models, particularly in the most vulnerable countries;]
- (j) Enhance or develop the needed information and knowledge base (both biophysical and socioeconomic), including improving scientific research, data systems and data collection, to support adaptation and catalyze adaptation investments. This includes enhancing observations and data, and making that data available, to inform assessment and planning for adaptation and provide inputs for approaches such as parameterized insurance;
- (k) Integrate knowledge, experiences and lessons learned from existing activities, including those carried out at the community level as well as activities from ongoing initiatives such as the Nairobi Work Programme, into adaptation planning;
- (l) Improve knowledge of the socio-economic aspects of climate change and promote the integration of socio-economic information into impact and vulnerability assessments;

- (m) Exchange experiences and opportunities relating to the development and dissemination of measures, methodologies and tools aimed at increasing economic resilience;
- (n) Exchange experiences and lessons learned in economic diversification, including ways to develop institutional capacity, and improve understanding of how economic diversification can be integrated into sustainable development plans, especially those that promote sustainable economic growth and eradication of poverty;
- (o) Elaborate best practices that can guide immediate actions with an eye to building long-term resilience to extreme events and disasters, including through implementation of the Hyogo Framework for Action;
- (p) [Encourage pilot projects [to increase and create synergy and champions] related to [microinsurance and [global] risk pooling] [improving adaptive capacity] [, [where] [as] appropriate] [within a country-driven approach to adaptation] [that do not impose additional burdens on the already vulnerable;]
- (e) [Inform and involve the most vulnerable groups in the decision-making process and management of adaptation activities;]
- (f) [Engage in [a [three-year] pilot phase of] adaptation activities implemented cooperatively, to catalyse rapid learning about adaptation good practice by supporting enhanced implementation of demonstration projects, programmes and policies in vulnerable countries, as well as regions, and communities groups, sectors, and ecosystems within all developing countries;]
- (g) [[Establish a short-term work programme up to and beyond 2012 in order to support the preparation and implementation of NAPAs, and to] support the strengthening of observation systems, the creation of databases for climate data, downscaling and targeted capacity-building for long-term planning.]

*Implementation of adaptation actions*

31. [All Parties shall undertake adaptation actions to reduce vulnerability and to build their resilience to the impacts of climate change.] [Parties should commit to promote adaptation to climate change by:

- (a) Setting as their common goal sustained and effective action to address adaptation to the impacts of climate change;
- (b) Taking immediate no regrets adaptation actions, wherever possible, using existing knowledge, resources, plans and processes;]

32. [The adaptation [implementation] [framework] [programme] [shall] [should] support and enhance the implementation of national adaptation programmes, projects, actions and plans [in all developing countries, particularly low-lying and other small island countries, countries with low-lying coastal, arid and semi-arid areas or areas liable to floods, drought and desertification, and developing countries with fragile mountainous ecosystems.]] [Developing countries that are particularly vulnerable to the adverse effects of climate change, especially the least developed countries and small island developing States, and further taking into account the needs of countries in Africa affected by drought, desertification and floods shall be provided with financial and technical assistance to support the implementation of adaptation actions as a means of building resilience to the impacts of climate change.] [Developing country Parties shall be assisted by developed country Parties to implement adaptation activities, projects, programmes, strategies, actions identified through various national processes, including in National Communications.]

33. [Adaptation [action] [plan] includes:]

- (a) [Specific [short-, medium- and long-term] adaptation programmes, projects, and actions for implementation [at local, subnational and national levels] [at all levels, including local, subnational and national levels] [at project and sectoral level]; activities identified in the national adaptation plans, and in integrated climate territorial plans [and cross-sectoral and sector-based activities], including NAPAs; and from the household up through macro-level to ensure adaptation actions respond to the needs of entire communities;]
- (b) [Programmes, projects, actions, strategies and measures to reduce, manage and share risk, including early warning systems, insurance-related activities [and activities addressing loss and damage from climate change impacts, including those arising from extreme weather events] and gradual changes;]
- (c) [Programmes, projects, actions, strategies and measures] [Administrative and legislative actions] [to build resilience] [to enhance adaptive capacity], [including through economic diversification];
- (d) Strategies and measures geared to minimize adverse social, environmental and economic impacts on developing countries identified in Article 4, paragraphs 8 and 9, of the Convention;
- (e) [R&D, deployment, diffusion and transfer of [adaptation technologies] [technologies for adaptation], including capacity-building, taking into account [sector-specific adaptation technologies, ecosystem-scale intersectoral linkages and] endogenous national or regional adaptation technologies in a voluntary manner and consistent with relevant international agreements;]
- (f) [[Activities related to national and international [migration of] [displacement of] [planned relocation of] [responses to]] [Means to protect] [climate [refugees] [migrants]] [persons] [individuals and peoples] [displaced by] [affected by] [extreme climate events] [the [adverse] impact of climate change];]

34. [[All] [Annex I] Parties [[should promote] [the participation of] [involvement, coordination and communication across]] [are encouraged to engage] a [wide] range of [their] [stakeholders, including] [national and international organizations] [[R&D] institutions, universities, research centres] [agencies] [local communities,] the private sector and civil society, [indigenous peoples, women and children,] in supporting and implementing adaptation action [in developing country Parties] [, bearing in mind that the involvement of the private sector and other stakeholders should supplement and not substitute the role of the developed country Parties related to the provision of financial resources and transfer of technology under the Convention.]

**F. [Monitoring and review of adaptation action and support] [Monitoring and review of enabled and supported adaptation action] [Measures to facilitate adequate adaptation to climate change] [Review of progress]**

51. All Parties, [with additional financial and technical support provided to developing countries,] should [enhance] report[ing] [in national communications] on [progress and experience of adaptation action][measures to facilitate adequate adaptation][, and of support received or provided][to ensure the agreed full implementation of adaptation actions supported by finance and technology and commitments related to financial and technology support] [to facilitate the monitoring and review of adaptation commitments under the Copenhagen Agreement] [to ensure transparency, mutual accountability and governance] [in a measurable, reportable and verifiable manner], [utilizing scientific as well as sex-disaggregated socio-economic data and in the context of transparency, mutual accountability and robust governance] [integrating the monitoring of adaptation actions within existing country and organizational monitoring and evaluation systems].

52. [Progress [under][in the implementation of] the adaptation [framework] [programme], including the delivery of means of implementation to [all]] developing country Parties, particularly low-lying and other small island countries, countries with low-lying coastal, arid and semi-arid areas or areas liable to floods, drought and desertification, and developing countries with fragile mountainous ecosystems that are particularly vulnerable to the adverse effects of climate change; and progress in building resilience and reducing vulnerability], [should][must] be [monitored][reviewed][and evaluated][is necessarily linked to the finance, transfer of technology and capacity building] [to ensure the full implementation of adaptation actions and commitments of developed country Parties under Article 4.3, 4.4 and 4.5 of the Convention]. [Progress in the compliance of financial commitments of Annex I Parties and in the implementation of the adaptation framework is necessarily linked to the finance, transfer of technology and capacity building. All of these aspects should be monitored and reviewed.]

53. [[Monitoring][and evaluation] entails, inter alia:] [A monitoring system shall be established for:] [A system for monitoring and reporting shall be established to evaluate the provision of adaptation support, including, inter alia:]

- (a) [Monitoring and recording these financial resources provided by developed country Parties;]
- (b) [Monitoring technology transferred to developing country Parties;]
- (c) [Monitoring [actions by Parties][the utilization and transfer of financial resources to, and support for capacity building] [to create enabling environments for technology transfer and adaptation][in developing country Parties][within their respective countries];]
- (d) [Evaluating the effectiveness of the implementation of adaptation actions, projects and programmes;]
- (e) [Evaluating the sufficiency of financial and technology support to developing country Parties every four years;]
- (f) [Ensuring that effective outcomes are realized from that support;]
- (g) [Determining and reporting, to the compliance committee, any discrepancies between financing and emission reduction commitments and quantities of resources delivered and reductions achieved on a country-by-country basis;]
- (h) [Examining NAPAs submitted by [the most vulnerable developing country Parties][particularly low-lying and other small island countries, countries with low-lying coastal, arid and semi-arid areas or areas liable to floods, drought and desertification, and developing countries with fragile mountainous ecosystems that are particularly

vulnerable to the adverse effects of climate change], on a country-by-country basis, to prioritize actions requiring assistance for implementation.]

54. [A [mechanism][system] for monitoring, reporting and/or providing feedback [shall] [should] be established] [for all Parties][for the review of financial commitments for adaptation activities] [and adaptation actions as part of the overall reporting system under a new climate regime][[as part of a compliance mechanism][for meeting commitments under Articles 4.3, 4.4 and 4.5]][with a committee of experts on the implementation of commitments contained in paragraph 4 of the Convention] [through [utilizing] [utilize] existing mechanisms to monitor and evaluate the provision and effectiveness of adaptation support, such as through multilateral funding and ODA channels.]]

**Annex I. Sources of consolidated paragraphs**

**B. Implementation [of adaptation action]**

<b>New para</b>	<b>Old para (page# in INF.1)</b>	<b>Opportunities for consolidation</b>	<b>Rationale for consolidation</b>
23 chapeau	Chapeau of x.2 (p.38), Chapeau of alternative 1 to para 23 (p.40)	Combine	Similar as they refer to all Parties and relate to planning
23(a)	x.2(b) (p.38)	None	
23(b)	Alternative 2(d) to paras 23-24 (p.44)	None	
23(c)	Alternative 1(e) to para 23 (p.40)	None	
23(d)	Alternative 1(b) to para 23 (p.40)	None	
24	23, alternatives 1, 2, second part of 3, 4 to chapeau of 23 (p.39), first part of alternative 2 to para 23 (p.40), x.1(d) (p.38), and x.4 (p.43)	Combine	All proposals relate to the wider issue of national adaptation plans
25	x.5 (p.43), alternative 3 to chapeau of 23 (p.39), and x.1(e) (p.38)	Combine	All proposals relate to the wider issue of supporting the preparation and implementation of national adaptation plans
26 chapeau	Last sentence of the chapeau of 23 (p.39)	None	
26(a)	23(a) (p.39), alternative 2(b) to paras 23-24 (p.44)	Combine	Proposals refer to catalyzing action
26(b)	23(a).1 (p.39)	None	
26(c)	23(b) (p.39)	None	
26(d)	23(c) (p.39)	None	
26(e)	23(d) (p.40)	None	
26(f)	23(e), alternative to sub-paras 23(e) and (f) (p.40), alternative 2 (a) to paras 23-24 (p.44)	Combine	Proposals relate to synergies between adaptation and mitigation
26(g)	23(f), alternative to sub-para 23(e) (p.40)	Combine	Proposals relate to the wider issue of natural systems
26(h)	23(f).1 (p.40)	None	
26(i)	23(f).2 (p.40)	None	
26(j)	23(f).3 (p.40)	None	
26(k)	23(f).4 (p.40)	None	
27 chapeau	Second part of chapeau of alternative 2 to para 23 (p.41), chapeau of x.3 (p.43)	Combine	Proposals relate to elements of the national adaptation plans
27(a)	Alternative 2(a) to para 23 (p.41), alternative sub-para (a) to para 23 (p.41), x.3(a) (p.43)	Combine	Similar proposed elements of national adaptation plans
27(b)	Alternative 2(b) to para 23 (p.41), alternative sub-para (b) to para 23 (p.41), x.3(b) (p.43)	Combine	
27(c)	Alternative sub-para (c) to para 23 (p.41), x.3(c) (p.43)	Combine	
27(d)	Alternative 2(c) to para 23 (p.41), Alternative sub-para (d) to para	Combine	

	23 (p.41), x.3(d) (p.43)		
27(e)	Alternative 2(d) to para 23 (p.41), Alternative sub-para (e) to para 23 (p.41), x.3(e) (p.43)	Combine	
27(f)	Alternative 2(e) to para 23 (p.41), Alternative sub-para (f) to para 23 (p.41), x.3(f) (p.43)	Combine	
27(g)	Alternative 2(f) to para 23 (p.41), alternative sub-para (g) to para 23 (p.41), x.3(g) (p.43)	Combine	
27(h)	Alternative sub-para (h) to para 23 (p.41), x.3(h) (p.43)	Combine	
27(i)	Alternative 2(g) to para 23 (p.41), alternative sub-para (i) to para 23 (p.41), x.3(i) (p.43)	Combine	
27(j)	Alternative sub-para (j) to para 23 (p.41), x.3(j) (p.43)	Combine	
28	x.2 (p.43)	None	
29	26, alternatives 1, 2, 3, and 4 (p.46)	Combine	All proposals relate to the wider issue of reporting on national adaptation plans
30 chapeau	Chapeau of 24, alternatives 1, 2, 3, and 4 to chapeau of para 24 (p.41), Alternative 1(a) to para 23 (p.40), Chapeau of 24.1 (p.44)	Combine	All proposals relate to the wider issue of enabling activities/environments
30(a)	24(a), alternative to 24(a) (p.41), 24.1(a) (p.44), x.1(c), x.2 (a) (p.38)	Combine	All proposals deal with the wider issue of integration adaptation
30(b)	24(a).1 (p.41)	None	
30(c)	24(b) (p.42), 24(g).1 (p.43), 24.1(b) (p.44), Alternative 2(g) to paras 23-24 (p.44)	Combine	Proposals relate to incentives/disincentives
30(d)	24(b).1 (p.42)	None	
30(e)	24(d), (p.42), 24.1(d) (p.44), x.2 (a,d) (p.38), Alternative 2(f) to paras 23-24 (p.44)	Combine	All proposals relate to impact, vulnerability and adaptation assessments
30(f)	24(c), 24(c) (ii).4 first part (p.42), 24.1(c) (p.44), Alternative 1(c) to para 23, (p.40),	Combine	Proposals relate to capacity-building
30(f)(i)	24(c)(i) and (i).1 (p.42)	Combine	Both relate to adaptation planning/implementation
30(f)(ii)	24(c)(ii) (p.42)	None	
30(f)(iii)	24(c)(ii).2 (p.42)	None	
30(f)(iv)	24(c)(ii).4 second part (p.42)	None	
30(f)(v)	24(c)(ii).1 (p.42)	None	
30(f)(vi)	24(c)(ii).3 (p.42)	None	
30(g)	24(f) (p.42), Alternative 2(e) to paras 23-24 (p.44)	Combine	Both proposals relate to education and training
30(h)	24(e) (p.42), 24.1(e) (p.44), Alternative 1(f) to para 23, (p.40), Alternative 2(c) to paras 23-24 (p.44)	Combine	All proposals relate to knowledge sharing
30(i)	Alternative 1(d) to para 23, (p.40),	None	
30(j)	x.2 (f) (p.38)	None	
30(k)	x.2 (g) (p.38)	None	

30(l)	25 (e).1 (p.45)	None	
30(m)	25 (e).2 (p.45)	None	
30(n)	25 (e).3 (p.45)	None	
30(o)	24(f).1 (p.42)	None	
30(p)	24(g), alternatives 1-4 (p.42-43)	Combine	Proposal deal with insurance pilot projects
30(q)	24(g), alternative 1, second part (p.42)	None	
30(r)	24(h) (p.43)	None	
30(s)	24(i) (p.43)	None	
31	x.1, (a,b) (p.37 and 38) and x.1 (p.45)	Combine	Both relate to adaptation action undertaken by Parties
32	x.1 (p.39), chapeau of 25, alternative to chapeau of 25 (p.44) and chapeau of x.2 (p.45)	Combine	All relate to supporting the implementation of adaptation, they only differ in the type of Parties being supported and the origin of the support
33(a)	25(a), 25(b).1 (p.44 and 45) and x.2 (a,b) (p.45)	Combine	All relate to specific adaptation actions
33(b)	25 (b) (p.45)	None	
33(c)	25(c) (p.45) and x.2(c) (p.46)	Combine	Both relate to building resilience
33(d)	25 (c).1 (p.45)	None	
33(e)	25(d) (p.45)	None	
33(f)	25(e), alternatives 1-3 (p.45) and x.2(d) (p.46)	Combine	All relate to the wider issue of climate-related migration
34	27, alternative 2 to para 25 (p.46), x.2 (e) (p.38), Alternative 1(g) to para 23, (p.40),	Combine	All proposals relate to engagement of stakeholders

**F. [Monitoring and review of adaptation action and support] [Monitoring and review of enabled and supported adaptation action] [Measures to facilitate adequate adaptation to climate change] [Review of progress]**

<b>New para</b>	<b>Old para (page#)</b>	<b>Opportunities for consolidation</b>	<b>Rationale for consolidation</b>
51	Para 51 (p.66); Alternative 2 to para 51 (p.66); Alternative to para 54, (p.67)	Combine	Largely principle: All refer to reporting.
52	Para 51; Alternative 1 to para 51; Alternative 3 to para 51 (p.66)	Combine	All refer to the need for the progress to be reviewed/monitored/evaluated.
53 chapeau	Para 52 chapeau (p.66)	None	
53 (a)-(h)	52 (a)-(c) (p.66); Alternative to sub-para C (p.66); (f)1; Para 53 option 3; Para 54 (p.67)	None	All refer to the components of what needs to be monitored/evaluated.
54	Para 53; Para 53 option 1; Alternative to para 53 option 1; Para 53 option 2; Para 53 option 3 (p.66)	Combine	All refer to establishing mechanism for monitoring.
