AD HOC WORKING GROUP ON LONG-TERM COOPERATIVE ACTION

UNDER THE CONVENTION

Fourteenth session (third part)

Panama City, 1.7 October 2011

WORK OF THE AWG-LCA CONTACT GROUP

Agenda item 3.2.2

Nationally appropriate mitigation actions by developing country Parties version of 14 October 2011 @ 16.30

Non-paper by the co-facilitators

- I. [Possible elements of draft decision text1 for adoption of modalities and procedures for international consultation and analysis]
- 1. Recall relevant decisions;
- 2. Recognize that ICA will be conducted on the basis of biennial [update] reports taking into consideration the flexibility provided for in paragraph 60 of decision 1/CP.16.
- 3. Recognize need to have an efficient, cost-effective and practical system which does not pose excessive burdens on Parties, the secretariat [and other stakeholders];
- 4. Prioritize the ICA process for all developing country Parties that submit biennial [update] reports in the first round of reporting. In subsequent rounds of biennial [update] reporting, frequency of the ICA process will be conducted on a biennial basis SIDS and LDCs may undergo ICA as a group of Parties at their discretion.
- *5. (..)*

[Option 1 to paragraph 4 above]

[Another option could be to select a representative sample of developing countries to undergo ICA on a rotational basis].

1 The following section will need to be further developed taking into account these considerations.

Possible elements of modalities and procedures for international consultation and analysis

I. Objectives

1. The overall objectives of the international consultation and analysis (ICA) of the biennial [update] reports are as follows:

Comment [情報システム厚生1]: 〇

ption 2 is integrated here. It is obvious that ICA is conducted every two years.

Deleted: could be differentiated based on the frequency of submission of biennial [update] reports, which could be based on a Party.s [share of global GHG emissions] [strong progress in implementation of mitigation actions or recently updated biennial report] and their capabilities

Deleted: Option 2 to paragraph 4 above:¶

ICA will be conducted on a biennial basis¶

- (a) To [facilitate] [enhance] the capacity-building efforts in developing country Parties:
- (b) To increase the transparency of nationally appropriate mitigation actions of developing country Parties [and their effects];
- (c) [To make information on emissions available to Parties];
- (d) To assist developing country Parties in overcoming difficulties in developing, implementing, reporting and verifying nationally appropriate mitigation actions through the sharing of best practices;
- (e) To promote continuous learning and improvement in implementing mitigation actions;
- (f) [To facilitate the information required by the Conference of the Parties to assess the implementation of the Convention];
- (g) To assist Parties in addressing technical difficulties faced in preparation of the biennial [update] reports;
- (h) To provide transparency regarding the extent to which mitigation actions contained in document FCCC/AWGLCA/2011/ INF.1 have been implemented.
- 2. In addition to the overall objectives in paragraph 1, specific objectives of technical analysis are as follows:
- (a) To determine [identify] whether the information required has been submitted;
- (b) [To [analyse] whether a Party.s actions are implemented [and effective] in achieving their objective;]
- (c) To understand methodologies used and assumptions made;
- (d) To identify difficulties faced by the Party concerned with respect to development, implementation, reporting and verification of nationally appropriate mitigation actions and [upon request] provide recommendations where possible;
- (e) To identify difficulties faced by the Party concerned with respect to development of greenhouse gas inventories.
- (f) To identify support needs.
- 3. In addition to the overall objectives in paragraph 1, the specific objective of the international consultations is to promote transparency of developing country mitigation actions [and GHG emissions] through a facilitative consultation process and to build the capacity of developing country Parties.

II. Principles

Deleted: [domestically funded]

Comment [Y2]: In accordance with para 63 of the Cancun Agreements (Decision 1/CP.16), this piece of objectives of ICA should be stated as follows.

(b) To increase the transparency of nationally appropriate mitigation actions of developing Parties and their effects

Deleted: [supported by developed countries]

Comment [Y3]: Following should be added as one of specific objectives of technical analysis, possibly after (d).

-To identify difficulties faced by the Party concerned with respect to development of greenhouse gas inventories.

Deleted: e

- 4. The principles that provide the basis for the ICA are as follows:
- (a) Be non-intrusive, non-punitive, non-confrontational and respectful of national sovereignty;
- (b) Be a facilitative and cooperative process based on interactive dialogue;
- (c) [Be voluntary] and fully involve the Party concerned;
- (d) Take into account the wider economic and development needs of the Party concerned, as well as its national circumstances;
- (e) [Promote] universal participation with flexibilities for Small Island Developing States and Least Developed Countries;
- (f) [Not be overly burdensome on the Party concerned in terms of time, human and financial resources;]
- (g) [Discussions regarding the appropriateness of domestic policies and measures do not form part of the ICA process];
- (h) [ICA will not be more onerous than international assessment and review process for developed country Parties;]
- (i) ICA will provide an opportunity to assess the progress in implementation of mitigation actions of each developing country party and identify possible policy of options to improve their outcomes if necessary;

III. Process and scope

Option 1

1. Process

- 5. The ICA process will consist of the following two steps and will be completed within a fixed timeframe:
- (a) A technical analysis of biennial [update] reports by a team of technical experts;
- (a) alt. A technical analysis of biennial [update] reports through written questions and answers between the Party concerned and other Parties, facilitated by the secretariat. The technical analysis process will consist of questions posed in writing, by other Parties, on the biennial [update] reports to which the Party concerned will reply in writing. Subsequently, the secretariat will compile a synthesis of this exchange between Parties. This synthesis report would become a part of the SBI agenda, enabling international consultations.
- (b) International consultations on biennial [update] reports and expert analysis reports under the Subsidiary Body for Implementation.

Deleted: [ICA will not [impose][make recommendations for] new commitments on developing country Parties;]

Comment [Y4]: These two
principles should be deleted. As for
(j), according to the Cancun
Agreement, neither ICA nor
submission of BURs is dependant on
developed country's commitment on
provision of support.
Principle (k) is also not appropriate
because support needs are not a scope
of ICA stated in paragraph 63-64 of
the Cancun Agreement.

Deleted: (j) ICA and submission of biennial update reports are dependent on fulfilment of developed country commitment on provision of support.¶

(k) ICA will provide a report on the support needs, including for enabling environment, required for preparation of biennial update reports from developing country Parties.¶

Comment [Y5]: Japan supports

Option 1 (paragraph 5-18) regarding the process of technical analysis and international consultation, as the sequence outlined in this document is appropriate in order that international consultation is conducted in efficient and effective manner. A technical analysis by experts before international consultation will halm to the first technical analysis by experts before

2. Scope

6. ICA will be based on the biennial [update] reports of developing country Parties that coincide with national communications of Parties not included in Annex I to the Convention submitted every four years and of biennial update reports submitted in intervening years.

A. Technical analysis

1. Inputs

- 7. The technical analysis of biennial [update] reports will focus on:
- (a) Greenhouse gas inventories and national inventory report;
- (b) Information on [unsupported] mitigation actions, including a description, analysis of the inpacts and associated methodologies and assumptions;
- (c) [Progress of implementation of mitigation actions;]
- (d) [Information on the Party.s] domestic measurement reporting and verification system, including support received for it; and
- (e) [Information on support received].

2. Process

8. [At the commencement of an ICA cycle for each developing country Party, the secretariat will assemble a technical experts team of five to eight members, drawing from [a pool of 50] Partynominated experts [constituted for completing both ICA and IAR processes and hosted by the UNFCCC secretariat], balanced as to expertise and developed/developing country Party participation.

The members of the expert team would serve in their personal capacity.]

- 9. The team will be supported by the secretariat staff.
- 10. The team will be led by two experts, one from a developing Party and the other from a developed country Party.
- 11. Two to three experts, of which at least one will be from a non-Annex I country and one from an Annex I-country, will focus on the analysis of national GHG inventories.
- 12. The technical analysis of the biennial [update] reports by technical experts will take place in consultation with the Party concerned, in a manner that contributes to

Deleted: 6bis. ICA will be based on the biennial update reports submitted in intervening years between National Communications.¶

Comment [Y6]: "inventory report" should be replaced by "national inventory report" as it is clearer.

Deleted: inventory reports

Deleted: their effects

Deleted: Status

Deleted: Any new i

capacity building.

- 13. [Experts will be authorized to meet directly with Party representatives, request additional documentation or information from the Party and conduct in-country visits, as necessary].
- 14. The country concerned could respond to the questions or suggestions of the expert team. [The expert team may also solicit information from other Parties or stakeholders if [incomplete information] or no national reporting were submitted].

3. Output

15. The output of the technical analysis by the technical experts team will be an analysis report. Prior to finalizing the report, the draft analysis report prepared by the expert team will be shared with the Party concerned for review and comment with the aim of resolving any difference of opinion between the expert teams and the Party on the report. The final analysis report, incorporating comments from the Party, should be made available at least two, and preferably four, weeks before the next session of the COP.

B. [International consultations in synergy and collaboration with local teams

1. Inputs

- 16. The inputs for the international consultations process are the following:
- (a) Expert analysis reports referred to in paragraph 15 above [synthesis report];
- (b) Biennial [update] reports.

2. Process

- 17. Following completion of the expert analysis report, a working group established by the SBI, open to all Parties will be convened to conduct international consultations. Parties will be allowed to submit written questions in advance. The ICA process will consist of the following:
- (a) One to three hours session of consultations, which will consist of a brief presentation by the Party concerned, followed by an oral question and answer session between [regional group representatives][Parties] and the Party concerned. Other Parties could participate as observers;
- (b) During the two-week period following the consultation process, any Party may submit in writing follow-up questions to the Party concerned within a specified time

period, for example two weeks, through the secretariat, to be answered by the Party concerned shortly thereafter, through the secretariat for example within a period of time (for example within two months).

(c) Parties with commonalities and anticipating limited questions in connection to their reports may request to combine into a single session in a joint consultation process.

3. Outputs

- 18. A summary report, prepared by the secretariat, would be issued to include the following:
- (a) [A technical expert analysis report referred to in paragraph 15 and 16 (a);]
- (b) [An objective record of the oral consultations in consultation with Party concerned];
- (c) [The questions submitted by Parties and their answers, and any observations that the Party concerned wishes to include, which are submitted within two months of the consultations].

Option 2 (Option to paragraphs 5 - 18)

The ICA process will consist of the following two steps:

- (a) Consultation on the biennial [update] reports between the team of technical experts and the Party concerned to facilitate provision of capacity-building support; and
- (b) Technical analysis of the biennial [update] reports by the team of technical experts.. This process will result in a technical summary report.

OR

Option 2 alt. The ICA process will consist of the following two steps:

- (a) The SBI will appoint a team of experts. These experts will consult with the Party concerned on the basis of its biennial [update] report.
- (b) The experts will prepare a summary report to be presented to the SBI for technical analysis and for possible conclusions. The summary report will also provide information on support received for implementation of mitigation actions.

C. Outcome of international consultations and analysis

19. The summary report would be presented to the SBI which would in turn provide advice and recommendations to the Party concerned.. In response to the recommendations of the SBI, [the Party concerned should submit follow-up reports within a certain period of time].

Attachment 6

Option to paragraph 19 above:

The summary report will be noted by the SBI in its conclusions.

Page 3: [1] Comment [Y5]

21/10/2011 22:27:00

Japan supports *Option 1* (paragraph 5-18) regarding the process of technical analysis and international consultation, as the sequence outlined in this document is appropriate in order that international consultation is conducted in efficient and effective manner. A technical analysis by experts before international consultation will help to focus issues to be attracted in the consultation.
