- pp4 *Noting* with grave concern the significant gap between the aggregate effect of Parties' mitigation pledges in terms of global annual emissions of greenhouse gases by 2020 [and aggregate emission pathways] consistent with having a likely chance of holding the increase in global average temperature below 2 °C or 1.5 °C above pre-industrial levels,

- pp10 *Emphasizing* the enduring benefits of ambitious and early action, including major cost reductions of mitigation and adaptation efforts in the future,
- pp11 [*Reiterating* the need to scale up quick-start opportunities that are [cost effective and] widely applicable, [such as reducing emissions from deforestation and forest degradation, and the role of conservation, sustainable management

of forests, and enhancement of forest carbon stocks in developing countries, the joint mitigation and adaptation mechanism for the integral and sustainable management of forests, and renewable energy].]
