One UN Training Service Platform for Climate Change: UN CC:Learn

Concept, Progress, Next Steps

Overview of Presentation

- 1. Introduction and Context**
- 2. Activity Areas**
 - 1. Knowledge Management**
 - 2. Development of a One UN CC Training Package**
 - 3. Country-driven Pilot Projects to Strengthen Human Resources, Learning and Skills Development**
- 3. Initial Activities: 2009-2010**

Context

- Implementation of the future global climate change regime creates unprecedented needs and opportunities for awareness raising, training, and skills development
- One UN Side events in Poznan in 2009 revealed opportunities for sharing experience and scaling up CC training in the UN system
- Concept note for a One UN Training Service Platform developed through collaboration of UNITAR, UNDP, UNEP, UNFCCC, CEB Secretariat and UNSSC
- UN CC:Learn complements CC:Inet by focusing on UN organizations and their operational activities
- UN CC:Learn at the disposal of UN agencies and Member States

Objectives

- Provide a one-stop window for accessing and sharing information on climate change training materials and activities of UN agencies
 - Foster development of One UN Climate Change Training Package
 - Support national processes to strengthen human resource and skills development on climate change, through One UN cooperation
 - Facilitate knowledge sharing on the design, delivery and evaluation of climate change training of UN agencies
-

Principles

- Build on, and provide value-added to existing national climate change processes and related country and UN project with a focus on training and skills development
- One UN collaboration operating within the CEB-facilitated UN Climate Change framework
- Facilitate input and ensure ownership of UN agencies and countries
- Ensure close linkages with the UNFCCC process and UNFCCC Secretariat (Capacity Development Framework, CC:Inet, etc)

Training

Training programmes target scientific, technical and managerial personnel and seek to spread specific technical skills that can have an immediate practical application. Examples include the ability to gather and interpret climate data, conduct inventories of national emissions, formulate national action plans and identify and exploit climate-friendly technologies. This section of CC:inet provides links to a wide range of training opportunities, experts, materials and programmes.

MAJOR CLIMATE CHANGE NEGOTIATIONS KICK-OFF IN BONN, GERMANY

The first in a series of major UN negotiating sessions this year, designed to culminate in an ambitious and effective international climate change treaty in Copenhagen in December, got underway in Bonn on Sunday, 29 March and will run until 5 April 2008. The UN Executive Secretary of the UN Climate Change Convention, called the session "critical for moving the world closer to a political solution to climate change."

On-line Inventory of UN System Activities on Climate Change Launched

27 March 2008: The UN Department of Public Information (DPI) has launched an On-line Inventory of UN System Activities on Climate Change. The inventory is available through the Gateway to the UN System's Work on Climate Change, and is intended to provide information on activities underway throughout the UN system in response to the global climate change challenge.

The database currently includes approximately 100 projects and is searchable by theme (adaptation, capacity building, financing, mitigation, REDD and technology) and by region (On-line Inventory of UN System Activities on Climate Change | Gateway to the UN System's Work on Climate Change)

Climate-L.org is a knowledge management project for international negotiations and related activities on climate change led by the International Institute for Sustainable Development (IISD), which is fully

Activity Areas

- 1. Knowledge Management and Networking**
 - Inventory of UN Learning and Training Resources
 - Information on UN-supported climate change training activities
- 2. Development of One UN Climate Change Training Package**
 - Introductory learning Materials
 - Thematic Learning Kits (cc and science, cc and health, etc)
- 3. Country Pilot Projects to Strengthen Human Resource, Learning and Skills Development on Climate Change**
 - Pilot projects in 2010-2011 (resources permitting)
 - Methodology to support development of a country-driven strategy to strengthen human resources, learning and skills development (in preparation)

Initial Activities: 2009-2010

- Development of an internet-based *Inventory of One UN Training and Learning Materials*
- Identifying thematic areas of a One UN Climate Change Training Package
- Steering Group Workshop, 29-30 October 2009
- Presence at Copenhagen Conference through exhibition
- Development of guidance methodology to support country-driven strategy to strengthen human resource and skills development on climate change
- One-Country-One UN pilot projects in 2010-2011
