

SYNTHESIS OF PARTY AND OBSERVER SUBMISSIONS

Andrew Howard, UNFCCC secretariat

Workshop on modalities and procedures for CCS under the CDM

Abu Dhabi, United Arab Emirates, 7-8 September 2011

Progressing the rules to include CCS in the CDM

Decision 2/CMP.5 sets out issues to be addressed

Decision 7/CMP.6 outlines specifically how these issues need to be addressed

Modalities and procedures are now to implement the requirements elaborated through previous decisions

Submissions by Parties and observers

- Views on how the issues identified at CMP 6 can be addressed in the modalities and procedures
- 10 submissions by Parties
FCCC/SBSTA/2011/MISC.10
- 1 IGO submission and 10 NGO submissions
FCCC/SBSTA/2011/MISC.11 (list only)
http://unfccc.int/parties_observers/igo/submissions/items/3714.php
http://unfccc.int/parties_observers/ngo/submissions/items/3689.php

Structure of chapter III

- Report distils themes and issues in the submissions
- Technical and legal issues identified
 - Site selection
 - Project boundaries and GHG accounting
 - Transboundary issues
 - Risk, safety and socio-environmental assessment
 - Monitoring
 - Permanence and liability
- Issues cover all aspects of decisions 2/CMP.5 and 7/CMP.6

Structure of chapter IV

- Seeks to identify possible modalities and procedures to address concerns raised at a technical and legal level
- Translation of ideas into M&P is as yet incomplete
- Many submissions sought mutatis mutandis approach
 - Most provisions remain valid for CCS projects
 - Only add to or change provisions where warranted by CCS needs
 - Chapter IV structured in line with standards CDM M&P
- Everything is connected – many issues will need addressing through multiple aspects of the M&P acting in unison
- Many areas of convergence – though details will take time
