Annex I

Information provided in accordance with paragraph 104 of decision 1/CP.21 related to entry into force of the Paris Agreement (Article 21)

Solely for the purposes of Article 21 of the Paris Agreement, information on the most up-to-date total and per cent of greenhouse gas emissions communicated by Parties to the Convention in their national communications, greenhouse gas inventory reports, biennial reports or biennial update reports, as at 12 December 2015, is provided in the table below.

*Note: Data based on the most up-to-date amounts communicated by the Parties to the Convention in their national communications, greenhouse gas inventory reports, biennial reports or biennial update reports. Since the amounts communicated by the Parties to the Convention in many cases did not include data on emissions by source and removals by sinks from land use, land-use change and forestry, or, when included, these emissions by source and removals by sinks were estimated using different methodologies, these data were not included. Also, since the communicated amounts are for different years, the total amount provided in this table should be used solely for the limited purposes of Article 21 of the Paris Agreement as it does not represent an accurate estimate of global greenhouse gas emissions.

* Countries that are member States of the European Union. The emissions of the European Union were 4,488,404 gigagrams in 2013, which represents the sum of the emissions of its member States in this table, and corresponds to 12.08 per cent of the total emissions in this table. The emissions of the European Union are not counted as additional to those of the member States.*
