

FORESTS DAY

Sunday, November 12, 2017

Overall narrative

The scientific evidence is clear: forests are a critical part of the answer to our climate challenge, both because of the emissions reductions that can be achieved by ending deforestation and because of the additional carbon that can be sequestered from the atmosphere through improved forest management and reforestation. In order to prevent global temperature increases of more than 1.5°C above pre-industrial levels, all sectors need to accelerate their efforts to decarbonize. Forests already remove from the atmosphere more than a quarter of carbon dioxide emissions emitted by fossil fuel combustion, but the contribution of forests to achieving the goals of the Paris Agreement could be much larger. Ending deforestation, improving management of forest carbon stocks, and restoring degraded and deforested lands could reduce total net emissions by up to 30%, buying valuable time to complete the energy transformation that will be required to avoid dangerous warming that crosses planetary thresholds. Unfortunately, much of this evidence is still unfamiliar to the broader climate change community. At the same time, forests also provide services that are essential for human societies to thrive, adapt, and achieve climate resilient societies. This includes important noncarbon climate benefits, like their role in sustaining livelihoods, providing water and food security, and regulating global rainfall patterns.

Thus, forests are essential for the success of the Sustainable Development Goals (SDGs) providing a window of opportunity for a "triple win": eliminate deforestation, boost agricultural productivity, and reduce poverty. A Global Platform for the New York Declaration on Forests (NYDF) has been established to support and accelerate achievement of the global forest goals embedded in the NYDF endorsed by national and sub-national governments, companies, indigenous peoples and civil society organizations. The Forests Action Area of the MPGCA shows that *much more is possible if we act together*. If we are to change our current emissions trajectory fast enough, we need to create a narrative of *both* differentiated responsibility and inclusion, where the bigger emitters lead but also where all contributions – by all countries and non-state actors, regardless of stage of development or size, are recognized. On the road to the Facilitative Dialogue in 2018, state and non-state actors need to continue to come together to demonstrate progress in the forest sector and inspire others to join the momentum and accelerate the pace of change.

Master of Ceremonies: Frances Seymour, Distinguished Fellow, World Resources Institute

Events

Time:	Forests Day Opening Plenary
10.00 - 10.30	
Room 5	

Master of Ceremonies: Frances Seymour, Distinguished Fellow, World Resources Institute

Opening remarks:

H.E. Aiyaz Sayed-Khaiyum, Fiji's Minister for Economy and Climate Change

H.E. Jochen Flasbarth, German Secretary of State

Mina Setra, Deputy Secretary General, Indigenous Peoples' Alliance of the Archipelago (AMAN)

Time:	Setting the scene: Paris Agreement: Unlocking the potential of
10.35 - 11.20	forests to achieve a 1.5 degree and climate resilient world
Room 5	

Short description

Forests are critical to address climate change. Addressing deforestation could reduce emissions by 24-30% and over the next decade. Forests also sustain human societies by supporting livelihoods, providing water and food security, and regulating global rainfall patterns.

Moderator: H.E. Manuel Pulgar-Vidal, WWF Global Climate and Energy Lead and former Minister of Environment for Peru and COP 20 President

Speakers:

Giacomo Grassi, Scientific Officer, Joint Research Centre of the European Commission Deborah Lawrence, Professor of Environmental Sciences, Univ. of Virginia; Eva Muller, Director of Forestry Policy and Resources Division, FAO;

Bronson Griscom, Director of Forest Carbon Science, The Nature Conservancy

Time:	Progress on implementation of climate action in forest protection and
11.25-12.35	restoration
Room 5	
Short description	

Climate action in forests is already underway. Most countries that submitted NDCs have included forests in their contributions, yet few NDCs have forest sectoral targets. Many are now committing resources to support action to reduce deforestation and expand restoration. Despite this progress, enhanced ambition is urgently needed.

Moderator: Inger Andersen, Director General, IUCN

Speakers:

María Victoria Chiriboga, Undersecretary of Climate Change, Ecuadorian Ministry of Environment;

H.E. Marcelo Mena Carrasco, Chilean Minister of Environment;

H.E. Dr. Gemedo Dalle, Ethiopian Minister of Environment, Forest and Climate Change; Karin Kemper, Senior Director of Environmental and Natural Resources, World Bank

Time:	Group photo and launch of the "Ride for Climate"
13:00	

Short description

The UN-REDD Programme, in collaboration with <2° – a climate initiative launched by the professional cycling team Cannondale-Drapac – and UNFCCC are holding a bike ride to put the spotlight on the role of forests as a climate mitigation measure.

Master of Ceremonies: Nick Nuttall, Spokesperson, UNFCCC

Welcome Remarks: Mario Boccucci, Head, UN-REDD Programme Secretariat

Speakers:

H.E. Frank Bainimarama, Fijian Prime Minister

H.E. Vidar Helgesen, Norwegian Minister of Climate and Environment

Patricia Espinosa, Executive Secretary, UNFCCC

Matthew Johnson, President and Founder, <2°

Time:	Enabling conditions to advance implementation and enhance
14.00-15.00	Nationally Determined Contributions
Room 5	

Short description

Governance, corruption, limited capacities and scarce funding are challenges for the forest sector. Addressing these challenges will require leadership by forest countries, but also

enhanced international support to scale up climate action and strengthen forest governance in developing countries.

Moderator: Mario Boccucci, Head, UN-REDD Programme Secretariat

Speakers:

Charlotte Streck, Co-Founder and Director, Climate Focus
Juan Chang, Senior Forest and Land Use Specialist, Green Climate Fund
Davyth Stewart, Head of Project Leaf, Interpol
Roberto Espinoza, Technical Adviser, Asociación Interétnica de Desarrollo de la Selva
Peruana (AIDESEP)

Time:	New Developments in Eliminating Deforestation from Key Supply
15.05-16.25	Chains
Room 5	

Short description

Agricultural commodity production drives 70% of tropical deforestation. Demand for these products could grow by 50% by 2050. A *triple win* (ending deforestation, boosting agricultural productivity and reducing poverty) can and must be achieved by decoupling commodity production from deforestation.

Moderator: Jeff Seabright, Chief Sustainability Officer, Unilever

Speakers:

Fernando Sampaio, Executive Director of PCI Strategy, State of Mato Grosso, Brazil Daan Wensing, Program Director Global Landscapes & Deforestation Commodities, IDH Cynthia Ong, Executive Director, Forever Sabah

Frederick Kugan, Deputy Director, Forestry Department of Sabah, Malaysia
Dr Christopher Stewart, Head of Corporate Responsibility and Sustainability, OLAM
Darlington Tuagben, Managing Director of Forest Development Authority, Liberia
H.E. Vidar Helgesen, Norwegian Minister of Climate and Environment
Kevin Rabinovitch, Global Vice President of Sustainability, Mars Inc.
Laura Phillips, Senior Vice President for Global Sustainability, Walmart

Time:	New platforms for forest action and advocacy: Indigenous
16.30 - 17.25	peoples' and religious leadership
Room 5	

Short description

Culture and religion inspire ambition to protect the rights of indigenous peoples and local communities – groups that manage about 25% of the world's tropical forests. Their land and resource rights are thus crucial to protect forests and the services (livelihoods, clean air and water) they provide.

Moderator: Bianca Jagger, Founder, President and Chief Executive of the Bianca Jagger Human Rights Foundation

Speakers:

Benki Piyako, Spiritual and political leader of the Ashaninka community of the Amônia River, Brazil

Rev. Fletcher Harper, Executive Director of GreenFaith

Sônia Guajajara, National Coordinator, Articulation of Indigenous Peoples of Brazil

Hindou Oumarou Ibrahim, Co-Chair, International Indigenous Peoples' Forum on Climate Change

Time:	Closing Plenary: Where are we going now? Lessons Learned,
17.30-18.00	opportunities and challenges
Room 5	

Master of Ceremonies: Frances Seymour, Distinguished Fellow, World Resources Institute

Remarks from UNFCCC Climate Champions:

Mr. Said Mouline, CEO of the National Agency for the Development of Renewable Energies and Energy Efficiency

Concluding remarks:

The Hon. Jerry Brown, Governor of the State of California

FOR INTERNAL PURPOSES (for all panels)

Contact person (e-mail and phone number): Charles McNeill, charles.mcneill@unep.org, +1 646 431-8038

Contact person (e-mail and phone number): María García Espinosa,
