## Climate Change Kiosk

Located on the upper concourse, the Climate Change Kiosk (CCKIOSK) is staffed daily between 9 a.m. and 6 p.m. The Climate Change Kiosk's primary goal is to provide information about the climate change process and the secretariat as well as the range of secretariat publications and digital materials.

**Climate Action talks** A series of climate talks, on the theme of “Time for action”, will be held at the Kiosk on selected days, featuring 15-minute presentations by speakers from civil society and governments. Invited speakers will focus on adaptation, technology transfer, CDM opportunities, local and regional level initiatives, and education and outreach. A full list is available from the Kiosk or via the [online schedule](#).

4–4.30 p.m.

**The role of local government in ensuring the aims of the Kyoto Protocol, as well as the UNFCCC.**

**Case study: City of Cape Town, South Africa**

As the sphere of governance closest to communities, local government is well placed to respond to the implementation of the aims of the UNFCCC and its Kyoto Protocol, decreasing greenhouse gas emissions and responding to the harmful impacts of climate change, in a manner that is sustainable. In South Africa, as is the case with most developing countries, this response is primarily from a developmental perspective and secondarily from a climate change perspective.

**Ms. Shirene Rosenberg**

City of Cape Town  
Environmental Resource Management Department  
Manager, Resource Conservation

4.30–5 p.m.

**Zoom – Kids on the move for climate protection**

A Europe-wide campaign for children aged 3 to 10 years on sustainable mobility and climate protection, running since 2002, with great success. By collecting “green footprints” the children show the “big ones” what the “small ones” are doing for the protection of the global climate. A “green footprint” is awarded for each journey made using a sustainable means of transport on foot, by bicycle, scooter, bus or rail.

**Ms. Britta Freitag**

Chief Executive Officer  
Climate Alliance  
Germany

5–5.30 p.m.

**Climate change effects on Nunavut**

Mr. Earle Baddaloo

Department of Environment  
Nunavut, Canada

5.30–6 p.m.

**Main activities of Perugia University about technologies for mitigation of greenhouse gases**

The Masters programme in technologies for greenhouse gases mitigation of the University of Perugia, directed by Professor Desideri, is the only Masters programme of its kind to date concerning this topic. The courses began in 2004. The spin-off TREE SRL, Technologies for Greenhouse Gases Reduction, is a company founded by many University of Perugia researchers and professors to apply research results to real cases in industry and energy systems. It also develops energy-related and environmental technologies for emissions mitigation.
