## الاتفاقية الإطارية بشأن تغير المناخ

الهيئة الفرعية للمشورة العلمية والتكنولوجية  
الدورة السابعة والعشرون  
بالي، ٣-١١ كانون الأول/ديسمبر ٢٠٠٧

البند ٩(د) من جدول الأعمال  
القضايا المنهجية في إطار بروتوكول كيوتو  
إرشادات الممارسات الجيدة فيما يتعلق بأنشطة استخدام الأراضي وتغيير استخدام  
الأراضي والحراجة في إطار الفقرتين ٣ و ٤ من المادة ٣ من بروتوكول كيوتو

إرشادات الممارسات الجيدة فيما يتعلق بأنشطة استخدام الأراضي وتغيير استخدام  
الأراضي والحراجة في إطار الفقرتين ٣ و ٤ من المادة ٣ من بروتوكول كيوتو

مشروع استنتاجات مقترح من الرئيس

إضافة

توصية الهيئة الفرعية للمشورة العلمية والتكنولوجية

قررت الهيئة الفرعية للمشورة العلمية والتكنولوجية، في دورتها السابعة والعشرين، أن توصي مؤتمر  
الأطراف العامل بوصفه اجتماع الأطراف في بروتوكول كيوتو باعتماد مشروع المقرر التالي في دورته الثالثة:

### مشروع مقرر -/م أ-٣

إرشادات الممارسات الجيدة فيما يتعلق بأنشطة استخدام الأراضي وتغيير استخدام الأراضي والحراجة في إطار الفقرتين ٣ و ٤ من المادة ٣ من بروتوكول كيوتو

إن مؤتمر الأطراف العامل بوصفه اجتماع الأطراف في بروتوكول كيوتو،

إذ يشير إلى الفقرتين ٣ و ٤ من المادة ٣، وإلى الفقرة ٢ من المادة ٥، وإلى المادة ٦ والفقرة ١ من المادة ٧ من بروتوكول كيوتو،

وإذ يشير أيضاً إلى المقررات ١٣/م أ-١، و ١٥/م أ-١، و ١٦/م أ-١ و ١٧/م أ-١،

وقد نظر في التوصيات ذات الصلة المقدمة من الهيئة الفرعية للمشورة العلمية والتكنولوجية،

١- يقرر أن تستخدم الأطراف، لأغراض إبلاغ المعلومات المكتملة للمعلومات الواردة في قوائم الجرد السنوية لغازات الدفيئة في فترة الالتزام الأولى، بالإضافة إلى العناصر المحددة في الفقرات ٥ - ٩ من مرفق المقرر ١٥/م أ-١، جداول لإدراجها في مرفق بالتقرير الوطني لقوائم الجرد وجدول نموذج الإبلاغ الموحد<sup>(١)</sup> لغرض تقديم معلومات عن انبعاثات غازات الدفيئة البشرية المنشأ بحسب مصادرها وعمليات إزالتها بواسطة المصارف من أنشطة استخدام الأراضي وتغيير استخدام الأراضي والحراجة المضطلع بها في إطار الفقرة ٣ من المادة ٣، والأنشطة المختارة، إن وجدت، في إطار الفقرة ٤ من المادة ٣، وفقاً للفقرة ٢ من المادة ٥ من بروتوكول كيوتو، المقرر الاضطلاع بها في عام ٢٠١٠ وما بعده؛ وترد هذه الجداول في مرفق هذا المقرر؛

٢- يطلب إلى الأمانة، استحداث نموذج للبرنامج الحاسوبي لنموذج الإبلاغ الموحد لهذه الجداول.

(١) نموذج الإبلاغ الموحد هو صيغة موحدة تستخدمها الأطراف في الإبلاغ الإلكتروني لتقديرات انبعاثات غازات الدفيئة وعمليات إزالتها وأية معلومات أخرى ذات صلة. ولأسباب فنية (منها مثلاً حجم الجداول وأشكال الأحرف)، لا يمكن في هذه الوثيقة توحيد شكل الصيغة المطبوعة لجداول نموذج الإبلاغ الموحد لأنشطة استخدام الأراضي وتغيير استخدام الأراضي والحراجة.

## Annex

**TABLE NIR 1. SUMMARY TABLE**

Activity coverage and other information relating to activities under Article 3.3 and elected activities under Article 3.4

Activity		Change in carbon pool reported <sup>(1)</sup>					Greenhouse gas sources reported <sup>(2)</sup>							
		Above-ground biomass	Below-ground biomass	Litter	Dead wood	Soil	Fertilization <sup>(3)</sup>	Drainage of soils under forest management	Disturbance associated with land-use conversion to croplands	Liming	Biomass burning <sup>(4)</sup>			
							N <sub>2</sub> O	N <sub>2</sub> O	N <sub>2</sub> O	CO <sub>2</sub>	CO <sub>2</sub>	CH <sub>4</sub>	N <sub>2</sub> O	
Article 3.3 activities	Afforestation and Reforestation													
	Deforestation													
Article 3.4 activities	Forest Management													
	Cropland Management													
	Grazing Land Management													
	Revegetation													

<sup>(1)</sup> Indicate R (reported), NR (not reported), IE (included elsewhere) or NO (not occurring), for each relevant activity under Article 3.3 or elected activity under Article 3.4. If changes in a carbon pool are not reported, it must be demonstrated in the NIR that this pool is not a net source of greenhouse gases. Indicate NA (not applicable) for each activity that is not elected under Article 3.4. Explanation about the use of notation keys should be provided in the text.

<sup>(2)</sup> Indicate R (reported), NE (not estimated), IE (included elsewhere) or NO (not occurring) for greenhouse gas sources reported, for each relevant activity under Article 3.3 or elected activity under Article 3.4. Indicate NA (not applicable) for each activity that is not elected under Article 3.4. Explanation about the use of notation keys should be provided in the text.

<sup>(3)</sup> N<sub>2</sub>O emissions from fertilization for Cropland Management, Grazing Land Management and Revegetation should be reported in the Agriculture sector. If a Party is not able to separate fertilizer applied to Forest Land from Agriculture, it may report all N<sub>2</sub>O emissions from fertilization in the Agriculture sector.

<sup>(4)</sup> If CO<sub>2</sub> emissions from biomass burning are not already included under changes in carbon stocks, they should be reported under biomass burning; this also includes the carbon component of CH<sub>4</sub>. Parties that include CO<sub>2</sub> emissions from biomass burning in their carbon stock change estimates should report IE (included elsewhere).

**Table NIR 1.1 Additional information**

Selection of parameters for defining "Forest" under the Kyoto Protocol

Parameter	Range	Selected value
Minimum land area	0.05 - 1 ha	
Minimum crown cover	10 - 30 %	
Minimum height	2 - 5 m	

**Table NIR 2. LAND TRANSITION MATRIX**

Areas and changes in areas between the previous and the current inventory year <sup>(1), (2), (3)</sup>

To current inventory year From previous inventory year		Article 3.3 activities		Article 3.4 activities			Other <sup>(5)</sup>	Total area at the beginning of the current inventory year <sup>(6)</sup>
		Afforestation and reforestation	Deforestation	Forest Management (if elected)	Cropland Management (if elected)	Grazing Land Management (if elected)		
		(kha)						
Article 3.3 activities	Afforestation and Reforestation							
	Deforestation							
Article 3.4 activities	Forest Management (if elected)							
	Cropland Management <sup>(4)</sup> (if elected)							
	Grazing Land Management <sup>(4)</sup> (if elected)							
	Revegetation <sup>(4)</sup> (if elected)							
Other <sup>(5)</sup>								
<b>Total area at the end of the current inventory year</b>								

<sup>(1)</sup> This table should be used to report land area and changes in land area subject to the various activities in the inventory year. For each activity it should be used to report area change between the previous year and the current inventory year. For example, the total area of land subject to Forest Management in the year preceding the inventory year, and which was deforested in the inventory year, should be reported in the cell in column B and in the row of Forest Management.

<sup>(2)</sup> Some of the transitions in the matrix are not possible and the cells concerned have been shaded.

<sup>(3)</sup> In accordance with section 4.2.3.2 of the IPCC good practice guidance for LULUCF, the value of the reported area subject to the various activities under Article 3.3 and 3.4 for the inventory year should be that on 31 December of that year.

<sup>(4)</sup> Lands subject to Cropland Management, Grazing Land Management or Revegetation which, after 2008, are subject to activities other than those under Article 3.3 and 3.4, should still be tracked and reported under Cropland Management, Grazing Land Management or Revegetation, respectively.

<sup>(5)</sup> “Other” includes the total area of the country that has not been reported under an Article 3.3 or an elected Article 3.4 activity.

<sup>(6)</sup> The value in the cell of row “Total area at the end of the current inventory year” corresponds to the total land area of a country and is constant for all years.

**TABLE NIR 3. SUMMARY OVERVIEW FOR KEY CATEGORIES FOR LAND USE, LAND-USE CHANGE AND FORESTRY ACTIVITIES UNDER THE KYOTO PROTOCOL**

KEY CATEGORIES OF EMISSIONS AND REMOVALS	GAS	CRITERIA USED FOR KEY CATEGORY IDENTIFICATION			COMMENTS <sup>(3)</sup>
		Associated category in UNFCCC inventory <sup>(1)</sup> is key (indicate which category)	Category contribution is greater than the smallest category considered key in the UNFCCC inventory <sup>(1), (4)</sup> (including LULUCF)	Other <sup>(2)</sup>	
Specify key categories according to the national level of disaggregation used <sup>(1)</sup>					
<i>For example: Cropland Management</i>	<i>CO<sub>2</sub></i>	<i>X (Cropland remaining Cropland)</i>			

<sup>(1)</sup> See section 5.4 of the IPCC good practice guidance for LULUCF.

<sup>(2)</sup> This should include qualitative consideration as per section 5.4.3 of the IPCC good practice guidance for LULUCF or any other criteria.

<sup>(3)</sup> Describe the criteria identifying the category as key.

<sup>(4)</sup> If the emissions or removals of the category exceed the emissions of the smallest category identified as key in the UNFCCC inventory (including LULUCF), Parties should indicate YES. If not, Parties should indicate NO.

**TABLE 5(KP) REPORT OF SUPPLEMENTARY INFORMATION FOR LAND USE, LAND-USE CHANGE AND FORESTRY ACTIVITIES UNDER THE KYOTO PROTOCOL <sup>(1), (2)</sup>**

Country

<b>B. Article 3.4 activities</b>				
B.1. Forest Management (if elected)				
B.2. Cropland Management (if elected)				
B.3. Grazing Land Management (if elected)				
B.4. Revegetation (if elected)				
<b>Information item:</b>				
A.1.2. Units of land harvested since the beginning of the commitment period <i>[specify identification code]</i>				
<b>Documentation box</b>	Parties should provide detailed explanation on the land use, land-use change and forestry sector in the relevant annex of the NIR: Supplementary information on LULUCF activities under the Kyoto Protocol. Use this documentation box to provide references to relevant sections of the NIR if any additional details are needed to understand the content of this table.			

- (1) All estimates in this table include emissions and removals from projects under Article 6 hosted by the reporting Party.
- (2) If Cropland Management, Grazing Land Management and/or Revegetation are elected, this table and all relevant CRF tables should also be reported for the base year for these
- (3) According to the Revised 1996 IPCC Guidelines, for the purposes of reporting, the signs for removals are always negative (-) and for emissions positive (+). Net changes in carbon stocks are converted to CO<sub>2</sub> by multiplying C by 44/12 and by changing the sign for net CO<sub>2</sub> removals to be negative (-) and net CO<sub>2</sub> emissions to be positive (+).
- (4) CO<sub>2</sub> emissions from liming, biomass burning and drained organic soils, where applicable, are included in this column.
- (5) CH<sub>4</sub> emissions reported here for Cropland Management, Grazing Land Management and Revegetation, if elected, include only emissions from biomass burning (with the exception of savannah burning and agricultural residue burning which are reported in the Agriculture sector). Any other CH<sub>4</sub> emissions from Agriculture should be reported in the Agriculture sector.
- (6) N<sub>2</sub>O emissions reported here for Cropland Management, if elected, include only emissions from biomass burning (with the exception of savannah burning and agricultural residue burning which are reported in the Agriculture sector) and N<sub>2</sub>O emissions from mineral soils from conversion to Cropland of lands other than Forest Land (Table 5(KP-II)3). Any other N<sub>2</sub>O emissions from Agriculture should be reported in the Agriculture sector.
- (7) As both Afforestation and Reforestation under Article 3.3 are subject to the same provisions specified in the annex to decision 16/CMP.1, they can be reported together.

**Documentation box**  
Parties should provide detailed explanation on the land use, land-use change and forestry sector in the relevant annex of the NIR. Supplementary information on LULUCF activities under the Kyoto Protocol. Use this documentation box to provide references to relevant sections of the NIR if any additional details are needed to understand the content of this table.

- (1) Report here information on anthropogenic change in carbon stock for the inventory year for all geographical locations that encompass units of land subject to Afforestation and Reforestation under Article 3.3 not harvested since the beginning of the commitment period.
- (2) As both Afforestation and Reforestation under Article 3.3 are subject to the same provisions specified in the annex to draft decision 16/CMP.1 (Land use, land-use change and forestry), they can be reported together.
- (3) Geographical location refers to the boundaries of the areas that encompass units of land subject to Afforestation and Reforestation.
- (4) Activity data may be further subdivided according to climate zone, management system, soil type, vegetation type, tree species, ecological zone, national land classification or other criteria. Complete one row for each subdivision.
- (5) The signs for estimates of gains in carbon stocks are positive (+) and of losses in carbon stocks are negative (-).
- (6) Carbon stock gains and losses should be listed separately except in cases where, due to the methods used, it is technically impossible to separate information on gains and losses. In that case, net gains should be reported in the "Gains" column and net losses should be reported in the "Losses" column. The notation key IE should be filled in, in the other column.
- (7) Note that net change corresponds to increase/decrease of carbon stock (see table 4.2.6a of the IPCC good practice guidance for LULUCF).
- (8) This information is needed for the calculation of the net carbon stock changes in soils per area.
- (9) According to the Revised 1996 IPCC Guidelines, for the purposes of reporting, the signs for removals are always negative (-) and for emissions positive (+). Net changes in carbon stocks are converted to CO<sub>2</sub> by multiplying C by 44/12 and changing the sign for net CO<sub>2</sub> removals to be negative (-) and for net CO<sub>2</sub> emissions to be positive (+).
- (10) The value reported here is an emission and not a carbon stock change.

- (1) If Cropland Management has been elected, report here information on anthropogenic carbon stock change for the inventory year for all geographical locations that encompass land subject to Cropland Management under Article 3.4.
- (2) If Cropland Management has been elected, this table and all relevant tables should also be reported for the base year for Cropland Management.
- (3) Geographical location refers to the boundaries of the areas that encompass land subject to Cropland Management (if elected).
- (4) Activity data may be further subdivided according to climate zone, management system, soil type, vegetation type, tree species, ecological zone, national land classification or other criteria. Complete one row for each subdivision.
- (5) The signs for estimates of gains in carbon stocks are positive (+) and of losses in carbon stocks are negative (-).
- (6) Carbon stock gains and losses should be listed separately except in cases where, due to the methods used, it is technically impossible to separate information on gains and losses. In that case, net gains should be reported in the "Gains" column and net losses should be reported in the "Losses" column. The notation key IE should be filled in, in the other column.
- (7) Note that net change corresponds to increase / decrease of carbon stock (see table 4.2.6b of the IPCC good practice guidance for LULUCF).
- (8) The value reported here is an emission and not a carbon stock change.
- (9) This information is needed for the calculation of the net carbon stock changes in soils per area.
- (10) According to the Revised 1996 IPCC Guidelines, for the purposes of reporting, the signs for removals are always negative (-) and for emissions positive (+). Net changes in carbon stocks are converted to CO<sub>2</sub> by multiplying C by 44/12 and changing the sign for net CO<sub>2</sub> removals to be negative (-) and for net CO<sub>2</sub> emissions to be positive (+).

Parties should provide detailed explanation on the land use, land-use change and forestry sector in the relevant annex of the NIR: Supplementary information on LULUCF activities under the Kyoto Protocol. Use this documentation box to provide references to relevant sections of the NIR if any additional details are needed to understand the content of this table.

- <sup>(1)</sup> N<sub>2</sub>O emissions from fertilization for Cropland Management, Grazing Land Management and Revegetation should be reported in the Agriculture sector. If a Party is not able to separate fertilizer applied to Forest Land from Agriculture, it may report all N<sub>2</sub>O emissions from fertilization in the Agriculture sector. This should be explicitly indicated in the documentation box.
- <sup>(2)</sup> Direct N<sub>2</sub>O emissions from fertilization are estimated following section 3.2.1.4.1 of the IPCC good practice guidance for LULUCF based on the amount of fertilizer applied to land under Forest Management. The indirect N<sub>2</sub>O emissions from Afforestation and Reforestation and land under Forest Management are estimated as part of the total indirect emissions in the Agriculture sector based on the total amount of fertilizer used in the country. Parties should show that double counting of N<sub>2</sub>O emissions from fertilization with Agriculture sector estimates has been avoided.
- <sup>(3)</sup> In the calculation of the implied emission factor, N<sub>2</sub>O emissions are converted to N<sub>2</sub>O-N by multiplying by 28/44.
- <sup>(4)</sup> Geographical location refers to the boundaries of the areas that encompass units of land subject to Afforestation and Reforestation.
- <sup>(5)</sup> Geographical location refers to the boundaries of the areas that encompass land subject to Forest Management (if elected).

Parties should provide detailed explanation on the land use, land-use change and forestry sector in the relevant annex of the NIR: Supplementary information on LULUCF activities under the Kyoto Protocol. Use this documentation box to provide references to relevant sections of the NIR if any additional details are needed to understand the content of this table.

<sup>(1)</sup> Methodologies for estimating N<sub>2</sub>O emissions from drainage of soils are not addressed in the Revised 1996 IPCC Guidelines, but Appendix 3a.2 of the IPCC good practice guidance for LULUCF provides methodologies for consideration.

<sup>(2)</sup> N<sub>2</sub>O emissions from drainage of soils include those resulting from Forest Management. N<sub>2</sub>O emissions from drained Cropland and Grassland soils are covered in the Agriculture sector under Cultivation of Histosols.

<sup>(3)</sup> Geographical location refers to the boundaries of the areas that encompass land subject to Forest Management (if elected).

<sup>(4)</sup> In the calculation of the implied emission factor, N<sub>2</sub>O emissions are converted to N<sub>2</sub>O-N by multiplying by 28/44.

<b>Documentation box</b>			
Parties should provide detailed explanation on the land use, land-use change and forestry sector in the relevant annex of the NIR: Supplementary information on LULUCF activities under the Kyoto Protocol. Use this documentation box to provide references to relevant sections of the NIR if any additional details are needed to understand the content of this table.			

<sup>(1)</sup> Methodologies for N<sub>2</sub>O emissions from disturbance associated with land-use conversion to Croplands are found in section 3.3.2.3.1.1 of the IPCC good practice guidance for LULUCF. N<sub>2</sub>O emissions from fertilization in the preceding land use and new land use should not be reported here. Parties should avoid double counting with N<sub>2</sub>O emissions from drainage and from cultivation of organic soils reported in Agriculture under Cultivation of Histosols.

<sup>(2)</sup> According to the IPCC good practice guidance for LULUCF N<sub>2</sub>O emissions from disturbance of soils are only relevant for land conversions to Cropland. N<sub>2</sub>O emissions from Cropland Management when Cropland is remaining Cropland are included in the Agriculture sector.

<sup>(3)</sup> Geographical location refers to the boundaries of the areas that encompass units of land subject to Deforestation.

<sup>(4)</sup> Geographical location refers to the boundaries of the areas that encompass land subject to Cropland Management, if elected.

<sup>(5)</sup> In the calculation of the implied emission factor, N<sub>2</sub>O emissions are converted to N<sub>2</sub>O-N by multiplying by 28/44.

<sup>(6)</sup> N<sub>2</sub>O emissions associated with Deforestation followed by the establishment of Cropland should be reported under Deforestation even if Cropland Management is not elected under Article 3.4.

<sup>(7)</sup> Parties may separate data for organic and mineral soils, if they have data available.

<sup>(8)</sup> This includes N<sub>2</sub>O emissions in land subject to Cropland Management from disturbance of soils due to the conversion to Cropland of lands other than Forest Lands.

<sup>(9)</sup> Units of land subject to Deforestation under Article 3.3 otherwise subject to elected activities under Article 3.4 are implicitly included under A.2. They are reported here for transparency and to fulfil the requirement of paragraph 6 (b) (ii) of the annex to decision 15/CMP.1.

<sup>(10)</sup> N<sub>2</sub>O emissions from Cropland are included in the Agriculture sector.

**Documentation box**

Parties should provide detailed explanation on the land use, land-use change and forestry sector in the relevant annex of the NIR. Supplementary information on LULUCF activities under the Kyoto Protocol. Use this documentation box to provide references to relevant sections of the NIR if any additional details are needed to understand the content of this table.

- (1) Geographical locations refers to the boundaries of the areas that encompass units of land subject to Afforestation and Reforestation.
- (2) Geographical location refers to the boundaries of the areas that encompass units of land subject to Deforestation.
- (3) Geographical location refers to the boundaries of the areas that encompass land subject to Forest Management, if elected.
- (4) Geographical location refers to the boundaries of the areas that encompass land subject to Cropland Management, if elected.
- (5) Geographical location refers to the boundaries of the areas that encompass land subject to Grazing Land Management, if elected.
- (6) Geographical location refers to the boundaries of the areas that encompass land subject to Revegetation, if elected.
- (7) For each activity, activity data should be selected between area burned (AB) or biomass burned (BB). Units will be ha for area burned, and kg dm for biomass burned. The implied emission factor will refer to the selected activity data with an automatic change in the units.
- (8) If CO<sub>2</sub> emissions from biomass burning are not already included in Tables 5(KP-1)A.1.1 to 5(KP-1)B.4, they should be reported here. This also includes the carbon component of CH<sub>4</sub>. This should be clearly documented in the documentation box and in the NIR. Parties that include all carbon stock changes in the carbon stock tables 5(KP-1)A.1.1 to 5(KP-1)B.4 should report IE (included elsewhere) in the CO<sub>2</sub> column.
- (9) Parties should report controlled/prescribed burning and wildfires emissions separately, where appropriate.
- (10) Burning of agricultural residues is included in the Agriculture sector.
- (11) Greenhouse gas emissions from prescribed savannah burning are reported in the Agriculture sector.

INFORMATION TABLE ON ACCOUNTING FOR ACTIVITIES UNDER ARTICLES 3.3 AND 3.4 OF THE KYOTO PROTOCOL

Commitment period accounting   
 Annual accounting

Country  
 Inventory Year  
 Submission

Number of the reported year in the commitment period:

GREENHOUSE GAS SOURCE AND SINK ACTIVITIES	BY <sup>(5)</sup>	Net emissions/removals <sup>(1)</sup>					Accounting Parameters <sup>(7)</sup>	Accounting Quantity <sup>(8)</sup>	
		2008	2009	2010	2011	2012			Total <sup>(6)</sup>
		(Gg CO <sub>2</sub> equivalent)							
<b>A. Article 3.3 activities</b>									
<b>A.1. Afforestation and Reforestation</b>									
A.1.1. Units of land not harvested since the beginning of the commitment period <sup>(2)</sup>									
A.1.2. Units of land harvested since the beginning of the commitment period <sup>(2)</sup>									
<i>[specify identification code]</i>									
<b>A.2. Deforestation</b>									
<b>B. Article 3.4 activities</b>									
<b>B.1. Forest Management (if elected)</b>									
3.3 offset <sup>(3)</sup>									
FM cap <sup>(4)</sup>									
<b>B.2. Cropland Management (if elected)</b>									
<b>B.3. Grazing Land Management (if elected)</b>									
<b>B.4. Revegetation (if elected)</b>									

<sup>(1)</sup> All values are reported in table 5(KP) of the CRF for the relevant inventory year as reported in the current submission and are automatically entered in this table.

<sup>(2)</sup> In accordance with paragraph 4 of the annex to decision 16/CMP.1, debits resulting from harvesting during the first commitment period following Afforestation and Reforestation since 1990 shall not be greater than credits accounted for on that unit of land.

<sup>(3)</sup> In accordance with paragraph 10 of the annex to decision 16/CMP.1, a Party included in Annex I that incurs a net source of emissions under the provisions of Article 3.3, may account for anthropogenic greenhouse gas emissions by sources and removals by sinks in areas under forest management under Article 3.4, up to a level that is equal to the net source of emissions under the provisions of Article 3.3, but not greater than 9.0 megatonnes of carbon times five, if the total anthropogenic greenhouse gas emissions by sources and removals by sinks in the managed forest since 1990 are equal to, or larger than, the net source of emissions incurred under Article 3.3.

<sup>(4)</sup> In accordance with paragraph 11 of the annex to decision 16/CMP.1, additions to and subtractions from the assigned amount of a Party resulting from forest management under Article 3.4, after the application of paragraph 10 of the annex to decision 16/CMP.1 and resulting from forest management project activities undertaken under Article 6, shall not exceed the value inscribed in the appendix of the annex to decision 16/CMP.1, multiplied by five.

<sup>(5)</sup> Net emissions and removals in the Party's base year, as established by decision 9/CP.2.

<sup>(6)</sup> Cumulative net emissions and removals for all years of the commitment period reported in the current submission.

<sup>(7)</sup> The values in the cells "3.3 offset" and "FM cap" are absolute values.

<sup>(8)</sup> The accounting quantity is the total quantity of units to be added to or subtracted from a Party's assigned amount for a particular activity in accordance with the provisions of Article 7.4 of the Kyoto Protocol.
