(a) *The Global Environment Facility support continues to be in line with guidance from the Convention;*

(b) *Although developed country donors have provided new and additional funding for global environmental benefits to developing countries, this has been insufficient to cover the increasing agenda of the Global Environment Facility as agreed upon in the conventions;*

(c) *The Global Environment Facility support has been crucial in enabling countries to integrate climate change into their national development agendas;*

(d) *The Global Environment Facility support has assisted developing countries in introducing policies to address climate change and reduce and avoid greenhouse gas emissions;*

(e) *The Resource Allocation Framework has hindered the access of group countries to the Global Environment Facility, particularly in climate change, which may explain some of the discontent of the climate change community with the Global Environment Facility;*

(f) *The Global Environment Facility reporting requirements to the Conventions have generally been met, yet certain aspects require improvement;*
