Secretariat of the UNFCCC – United Nations Framework Convention on Climate Change

“As specified in the Decision 6/CP.17 of SBSTA, in which Parties and relevant organizations are invited to submit to the secretariat, by 17 September 2012, their views on potential future areas of work of the Nairobi work programme, on behalf of **Lea Correa Pinto, owner of ITEREI IGUASSU- Centro de Referencia do Movimento da Cidadania pelas Aguas Florestas e Montanhas, in São Paulo, Brazil**(It is a private wildlife area in the top of Brazilian Atlantic Coastal Range) it is proposed to establish an area of work on “mountains and climate change” in view of the special attention needed by mountain ecosystems to adapt to the effect of climate change. Mountains provide vital goods and services to more than half of the world’s population but they are fragile ecosystems that require specific protection and management.”

This proposal has the advantage, of being made by the private sector and will depend on resources and a program to be previously delineated and approved by ITEREI.

Important to inform that we are acting on behalf of mountains and its natural resources protection, since 1978
