Subsidiary Body for Scientific and Technological Advice

Forty-fifth session

Marrakech, 7–14 November 2016

Agenda item 11(b)

Methodological issues under the Kyoto Protocol

**Carbon dioxide capture and storage in geological formations
as clean development mechanism project activities**

Carbon dioxide capture and storage in geological formations as clean development mechanism project activities

Draft conclusions proposed by the Chair

1. In accordance with decision 5/CMP.8, paragraphs 40 and 41, the Subsidiary Body for Scientific and Technological Advice continued its consideration of the eligibility under the clean development mechanism of project activities consisting of carbon dioxide capture and storage in geological formations that involve the transport of carbon dioxide from one country to another or geological storage sites that are in more than one country; and the establishment of a global reserve of certified emission reduction units for carbon dioxide capture and storage in geological formations.
2. The Subsidiary Body for Scientific and Technological Advice recommended draft conclusions on this matter for consideration and adoption by the Conference of the Parties serving as the meeting of the Parties to the Kyoto Protocol at its twelfth session (for the text of the draft conclusions, see document FCCC/SBSTA/2016/L.19/Add.1).
