

# EU INPUT TO ARTICLE 6.2 WORKSHOP

BAKU, 2-4 OCTOBER 2024

## **SESSION 3**

# **AGREED ELECTRONIC FORMAT – AUTHORIZATIONS**

# Content

**Key principles for the AEF**

**Relationship of Tables 2 and 3 regarding authorization**

# Key principles for the AEF

Enable Parties to report on all elements in paragraph 20 of decision 2/CMA.3

The AEF should be able to reflect different type of cooperative approaches and not limit the way how Parties may engage in cooperative approaches

- Use towards NDCs ↔ Use towards OIMP
- Baseline-credit approaches ↔ ETS linking
- Underlying registries ↔ No underlying registry
- Different types of voluntary support to Adaptation Fund

Key elements should be reflected in decision text

- Action types and sub-types / first transfer

AEF reflects information recorded in ITMO registries and should be automatically pre-filled by ITMO registries

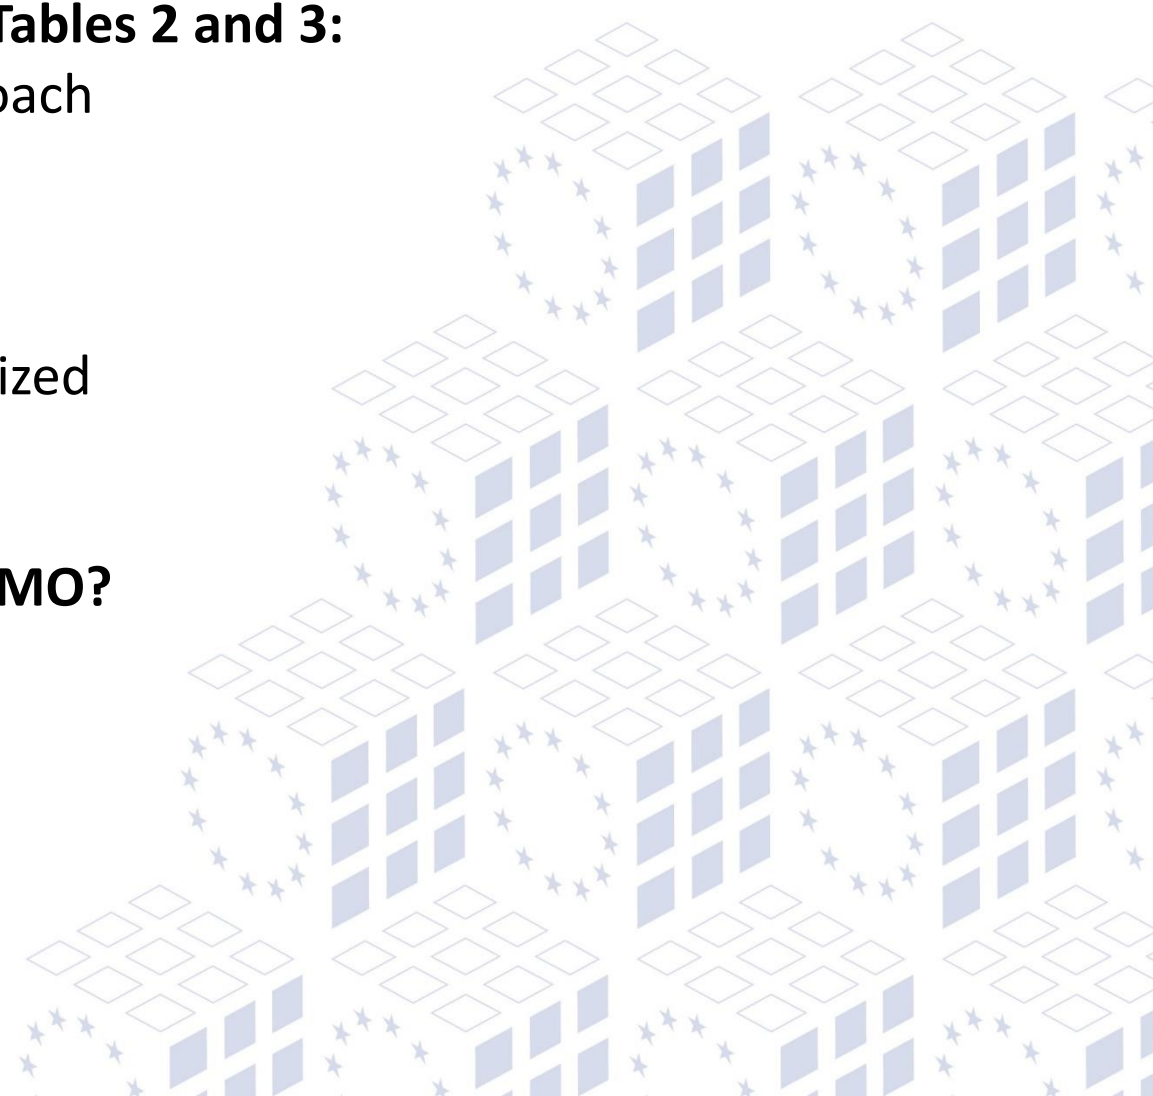

Link to other negotiation items (e.g. first transfer, authorization, registries)

# Relationship between Tables 2 and 3

## **EU's understanding of the relationship between Tables 2 and 3:**

- Table 2: Authorization of the cooperative approach
- Table 3:
  - Authorization of specific ITMOs, OR (if permitted)
  - Identification of the ITMOs that are authorized based on a single authorization process

**Underlying question: What is the “birth” of an ITMO?**

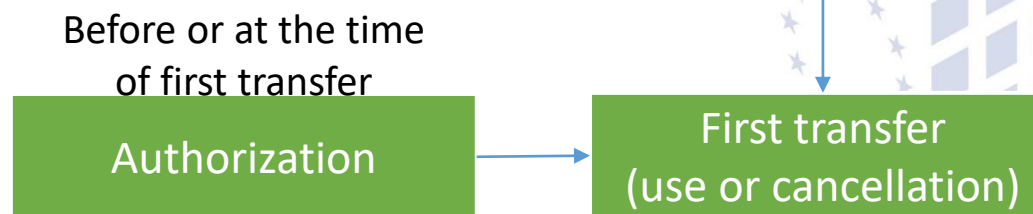

# Example: Use of carbon credits under CORSIA

**Underlying cooperative approach registry (e.g., VCS)**

**ITMO registry of the Party**

**Table 3 of AEF**

| Action date  | Action type    | Quantity | (...) |
|--------------|----------------|----------|-------|
| 3 March 2026 | Authorization  | 1,000    |       |
| 3 March 2026 | First transfer | 1,000    |       |

**THANK YOU FOR YOUR ATTENTION!**
