Mattias Söderberg, Co-chair of the Climate Justice Group of the ACT Alliance and Chief Advisor at DanChurchAid

Expectations:

- To deliver on the full mandate of the WIM, the combined contributions from both the ExCom and the SNLD are needed.
- There should be a strong relation between the ExCom, including its expert groups and task force, and the SNLD, to ensure coordination and coherence.
- All the different actors under WIM, including the ExCom, expert groups and the SNLD, should cooperate, and not duplicate, or contradict each other.

Roles:

- The ExCom, its expert groups and task force should provide guidance and advise to the SNLD.
- The SNLD should provide the ExCom and its expert groups and task force, with information, lessons learned and advise from the network and its activities.

To promote a good relation, ACT Alliance suggest:

- An advisory group, with both parties and other stakeholders, including civil society and representatives from local level, to coordinate between the ExCom and the SNLD.
- Participation from members of ExCom and expert groups in the Santiago Network and relevant activities and meetings.
- Joint annual report from the ExCom and the SNLD.
