

Technology Mechanism

Enhancing climate technology
development and transfer

The UNFCCC Technology Mechanism supports countries in developing and transferring climate technologies to reduce greenhouse gas emissions and adapt to a changing climate. Its two bodies, the Technology Executive Committee (TEC) and the Climate Technology Centre and Network (CTCN), work together to address policy and implementation issues related to climate technology efforts.

This side event will present the achievements and performance of the TEC and CTCN in 2016.

Programme

- 18.30 – 18.35 **Opening**
Mr. Richard Kinley, Deputy Executive Secretary, UNFCCC secretariat
- 18.35 – 18.50 **Technology Executive Committee: Promoting collaboration and providing policy recommendations**
