

Potential future joint activities TEC-CTCN

- In 2020 TEC-CTCN agreed two joint activities for 2021-2022:
 - ✓ Technology & NDC – wrapping up this year
 - ✓ Gender and technology – continuing in 2022
- Potential work highlighted from this year's work, for example:
 - ✓ Areas highlighted in the findings from technology-NDC (e.g. linkages between policy and implementation regarding technology)
 - ✓ Endogenous capacities and technologies (needs, gaps and challenges, identified based on feedback from NDEs, could inform the implementation support provided by the CTCN)
 - ✓ Joint analysis for implementation of M&E surveys
- The TEC and CTCN AB are invited to provide inputs on potential future joint activities TEC-CTCN
