

Agenda item TEC 8 (a) (i) / CTCN AB 4.1

Outcomes of COP 27 and CMA 4

Technology Executive Committee, 26th meeting and TEC-CTCN Joint session
21-23 and 24 March 2023, Songdo, Korea

Bhava Dhungana, Team Lead, UNFCCC secretariat

A look back – Technology at COP27

Agenda item	Item nr.
Joint annual report TEC and CTCN	SBSTA11/SBI17a/COP9a/CMA10a
Linkages between the TM and the FM	SBI 17b/COP9b
First periodic assessment of the TM	SBI 17c/CMA10b
Poznan strategic programme on technology transfer	SBI 17d

Joint annual report of the TEC and CTCN for 2022

18/CP.27 19/CMA.4

- The COP/CMA welcomed with appreciation the first joint work programme of the Technology Mechanism for 2023–2027, including the key joint activities and common areas of work outlined therein
- Strengthened engagement with the NDEs, including through enhanced support, feedback seeking, and outreach
- Improved reporting on the activities undertaken by the Technology Mechanism in response to mandates by Parties
- Required support to the Technology Mechanism, in particular securing funding for the CTCN

Periodic assessment of the Technology Mechanism 20/CM.4

- Parties acknowledged the findings of the final report of the first Periodic Assessment
- Parties requested TEC and CTCN to include in their annual reports information on actions undertaken in response to the recommendations contained in the periodic assessment (JWP, Response Plan Template, M&E, outreach products, resource mobilization)
- Parties welcomed the joint work programme of TEC and CTCN.
- Parties discussed the need of provision of support to the work of the Technology Mechanism and encouraged those in position to do so to provide enhanced support to its work.
- The Global Stocktake will consider the main challenges identified in the Periodic Assessment.
- Parties requested SBI 64 to initiate the second Periodic Assessment (2027) and requested the secretariat to incorporate activities under the technology framework, implementation of technology action plans, and levels of support at different stages of technology cycle.

Poznan Strategic Programme

- The SBI requested the CTCN to organize a knowledge-sharing workshop with African regional center in conjunction with the Africa climate week.
- The SBI welcomed the GEF support to 17 LDCs and SIDS for undertaking their TNAs, under the Fourth Global TNA project.
- The SBI 66 will continue consideration of the PSP, with a view to recommend a draft decision, to take stock of the progress, successes, lessons learned from implementing the PSP.

Linkages between Technology Mechanism and Financial Mechanism

- The agenda item was concluded with a procedural conclusion, and Parties are expected to continue their consultations at SBI 58, with a view to recommend a draft decision for consideration and adoption by the COP at COP28
- Parties agreed to take into account the draft negotiating text that was produced at SBI 57

Summary of the guidance from the COP and CMA

- Continue undertaking joint work and enhance the exchange of systematic feedback with a view to ensuring coherence and synergy and effective implementation of the Technology Mechanism

Outreach

- Jointly pursue collaborative partnerships and strategic engagement, processes and initiatives under and outside the Convention and the Paris Agreement, including with the private sector
- Jointly enhance resource mobilization efforts

Reporting

- Include information in their joint annual reports ... on activities and actions under the technology framework that have been implemented under the joint work programme
-on how the two entities have responded to the mandates of Parties in the implementation of their work
- Explore the opportunity of establishing an integrated monitoring and evaluation framework

Activities

- Jointly finalize the development of the gender roster of female experts
- Co-creation of knowledge products
- Strengthen engagement with the NDEs, including through enhanced support, feedback seeking, regional forums, and outreach
- Integrate relevant lessons learned when implementing the joint work programme of the Technology Mechanism for 2023–2027
 - Both entities to implement relevant recommendations of the TEC for 2022, on support for climate technologies, in their respective work plans

Thank you!
