To support Technology Framework implementation, specifically in reference to the following:

Actions and activities under this key theme should therefore accelerate and scale up innovation at different stages of the technology cycle, addressing both adaptation and mitigation in a balanced manner to help countries to build resilience and reduce their emissions, and be undertaken in a manner that enhances the effective participation of developing country Parties, fosters sustainable development and **ensures gender responsiveness**.

Enabling environment and capacity-building

16 (c) Facilitating countries in enhancing an enabling environment to promote endogenous and **gender-responsive technologies for mitigation and adaptation** actions.
