

Agenda item 7.b

Ongoing joint activities: gender and technology

TEC-CTCN joint session

28 March 2022 – hybrid meeting

Kinga Csontos
TEC Gender focal point

1. Desk review of existing gender rosters and platform

Preliminary desk research and analysis was conducted regarding:

- existing female expert rosters and platform in general;
- gender and climate expert rosters specifically.

The review of existing rosters and platforms showed that while numerous rosters focus on women experts in various fields, **none were specifically focused on either gender experts in the area of climate change or women experts in climate change sectors.**

2. Design of the roster

It is proposed to develop and maintain **two separate and distinct rosters**, both of which will be open to the public:

1. Female experts in the climate change field; and
2. Female and male gender experts within the climate change field.

Online template for sign-up, which will then be reviewed, validated, and approved by staff of the UNFCCC secretariat and/or the CTCN.

Gradual population of the roster before official launch (**testing phase**)

3. Sign up criteria and categories

Category of expertise /key words	Name	Country	Affiliation	Contact details	Country/ Region of expertise	Career stage	Languages	Publications/ other relevant info

Mitigation sectors

- Agriculture
- Carbon fixation and abatement
- Energy efficiency
- Forestry
- Industry
- Renewable energy
- Transport
- Waste management

Adaptation sectors

- Agriculture and forestry
- Coastal zones
- Early warning and environmental assessment
- Human health
- Infrastructure and urban planning
- Marine and fisheries
- Water

Cross-cutting approaches

- Community based
- Disaster risk reduction
- Ecosystems and biodiversity
- Endogenous technologies
- Gender (*If this category is selected, it will be suggested that the applicant also complete the Gender expert in Climate Change roster registration*)

Cross-sectoral enablers

- Advocacy and awareness
- Capacity building and training
- Economics and financial decision making
- Governance and planning (policy, regulatory systems)
- Innovation and RD&D

4. IT infrastructure

The roster can be set up and hosted at a minimal cost either on **UNFCCC website** or **CTCN website**.

In the case of setting up the roster on the UNFCCC website, the roster can then be linked to both the TEC and the CTCN's websites

Next steps

April 2022 – Solicit additional feedback from WGC and refine the roster

May 2022 - Prepare an introductory description of the roster and its potential uses for the landing page and outreach purposes.

May 2022 - Discuss partnering opportunities with relevant platforms, in order to promote broader awareness and use of the roster.

June 2022 - Decide upon and implement IT solutions

June 2022 - Finalize outreach and awareness raising plan including a call for experts to join the roster

October 2022 - Populate the expert roster with initial lists of experts

November 2022- Launch the expert roster at COP 27

Thank you!
