

Agenda item 3.a.ii

Innovative approaches for adaptation technologies

TEC/2020/20/9

Technology Executive Committee, 20th meeting
Virtual meeting, 1–3 April 2020

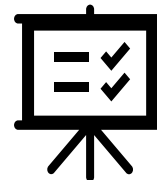

Background

- Task for 2020 (Activity 3 under thematic area Innovation):
 - ✓ *Promote innovative approaches, including through the development of scalable, business cases, local community participation, gender and cultural-sensitive approaches, to deploy, disseminate and scale up adaptation technologies*
- Deliverable for 2020: organisation of an in-session Technology Day
- Taskforce on Innovation developed a high-level concept of the event

**Discussion
session**

**Poster
session**

Key messaging: “Accelerating and scaling up climate technology innovations in adaptation will support the achievement of the goals of the Paris Agreement.”

Agenda item 3.a.ii – Innovative approaches for adaptation technologies.

	Session
15 min	Opening & welcome
45 min	Setting the scene
60 min	Successful business models in smart agriculture / agri-food: what are the co-benefits, what do we learn from them, how to scale them up?
60 min	Green buildings and climate-resilient infrastructure: making innovative approaches work
60 min	Opportunities for innovative climate-resilient technological solutions
45 min	Way forward: identifying concrete actions and policy options
15 min	Conclusions and closing remark

Poster session

- Organised in conjunction with the poster session of the Research and Systematic Observation (RSO) Dialogue
- Topic: Innovative R&D and science-based technological solutions for adaptation and mitigation

Communication & outreach plan

- Follow CO strategy: digital communication, UNFCCC newsroom, virtual participation, etc.

Thank you!
