INTRODUCTION

1. At the sixth, eighth and tenth sessions of the Intergovernmental Negotiating Committee for a Framework Convention on Climate Change, lists of publications drawn from the bibliographic databases of the interim secretariat were distributed (see A/AC.237/Misc.24, A/AC.237/Misc.24/Add.1 and A/AC.237/Misc.24/Add.2).

2. The current bibliography contains about 250 references (from MFN 1402 to MFN 1658) which have been added to the databases since August 1994. All references are listed in alphabetical order according to title (and no longer by MFN number). Documents of the eleventh session of the Committee and all national communications received at the interim secretariat before 16 March 1995 are listed separately. In addition, addresses of publishers are no longer included in the references, but appear at the end of the bibliography.

3. The interim secretariat hired a full time librarian to reorganize and manage its library and databases. The library collects, processes and disseminates information and documentation on climate change and related topics, and serves as an archival unit for the official documents of the Committee and the Conference of the Parties (COP). It also maintains the bibliographic databases CLIMA (containing more than 1600 references to books, reports and articles) and CC:PER (containing about 200 references to periodicals). These databases have recently been revised, and the presentation of bibliographical references standardized; in the near future, references will also include keywords.

4. Diskettes containing CLIMA and CC:PER databases will be distributed at the end of the first session of the COP. Upon request, the library can also provide lists of references on specific subjects, as well as copies of official Committee and COP documents. All publications are available for consultation in the library of the Climate Change Secretariat, Room C.511, Geneva Executive Centre, 11-13 Chemin des Anémones, Châtelaine, Geneva.

5. The inclusion of a reference in this bibliography does not reflect any endorsement of the publication by the United Nations or by any of its specialized agencies. Readers may reprint the contents for further distribution, provided the source is cited.

6. Readers of this bibliography are encouraged to continue sending books, articles, periodicals and other relevant information to the library.
