DESCRIPTION

Skills 21 project is a joint initiative of the Government of Bangladesh and the International Labour Organization (ILO), funded by the European Union.

The project seeks to increase productivity and employment opportunities through an environmentally conscious, inclusive, demand-driven, and interlinked skills development system responding to the needs of the labour market.

Skills 21 will help pave the way for the transition to a greener, more sustainable economy by providing skills for emerging occupations in green industries and mainstreaming environmental sustainability into the overall national skills development system.
