DESCRIPTION

The Climate Technology Centre & Network (CTCN), the Energy; and Resources Institute (TERI) and S2 Services invite you to the webinar focused on women's representation as Energy; professionals, active leaders and contributors to the global green Energy; supply chain.

Good practice examples from India, Nepal, Cameroon and Togo will showcase how women's engagement as technicians, entrepreneurs, and decisionmakers in grid-connected, off-grid and clean cooking initiatives support countries in achieving their national Energy; and sustainability goals.

What is the role of policy in strengthening equal participation in the supply chain? How can private sector and civil society support these processes?
