

# Enhancing Adaptation Finance through Blockchain

## Providing Institution(s)

United Nations Framework Convention on Climate Change (UNFCCC). Climate Technology Centre & Network (CTCN)

## Topic(s)

Climate finance

## Geographical reach

Global, Global

## Target level of capacity building

Institutional

## Resource Type

On-demand webinar

## Resource Language(s)

English (EN)

## Resource Date

2021

## RESOURCE LINK

Access

## DESCRIPTION

Blockchain technologies have been finding real-world utility globally and across the developing world over the last years.

An increasing number of blockchain use-cases are being developed as innovators and innovation ecosystems identify new ways of creating value.

Blockchain technologies also have a great potential for addressing challenges linked to climate change all over the world. This webinar provides an overview of blockchain in the context of adaptation finance, including disaster risk parametric insurance and adaptation infrastructure construction monitoring.

How can blockchain enhance the access to adaptation finance? How does a blockchain-based parametric insurance work?
