DESCRIPTION

This course module introduces the theme of climate change and health.

It explains how climate change impacts human health and describes mitigation and adaptation interventions in the health sector.

Additionally, it provides guidance to task teams on the World Bank's corporate climate commitments for the health sector as well as tools and support that task teams can draw on to enhance the climate resilience, adaptation and mitigation aspects including through the climate co-benefits assessment process in their operations.

Throughout the course, you will build a step-by-step plan for developing and delivering a communications campaign.
