## DESCRIPTION

While all of the SDGs are essential to sustainable development, SDG 13, Climate Action, is usually perceived as the most urgent in terms of the need for a swift implementation on a global scale.

Therefore, particular focus is given to this SDG.

Through the course, you will gain up-to-date knowledge of the current understanding of human impacts on the Earth at the planetary level.

Progress towards establishing global management of human interactions with the climate system within the United Nations Framework Convention on Climate Change (UNFCCC) is also discussed.
