Mitigation

DESCRIPTION

The Framework is a 9-step process underpinned by leadership and political buy-in, and strong and transparent stakeholder engagement that has three key outcomes:

Define a vision that will guide the pathway development process;
Identify priority actions with the most potential for economic transformation;
Implement the pathway and monitor progress towards goals.
The process promotes dialogues with local communities, businesses and other key stakeholders to develop a transformational process, or 'pathway', to reducing emissions.
