## DESCRIPTION

Applying a resilience lens strengthens the integration of climate risks and opportunities into the design and delivery of investments by enhancing the capacity of people, assets, institutions and infrastructure to harness and/or respond to the impacts of shocks and stresses.

The Resilience Booster is an interactive, step-by-step tool for development practitioners, including World Bank task teams, who are designing or working on climate resilient projects.

It helps teams to think through, specify and design project activities that build resilience by integrating resilience attribute
