Topic(s)

Nationally determined contributions (NDCs)

DESCRIPTION

The National Climate Action Plan (PNAC) is a key instrument that promotes Panama's long-term national and sectoral climate change ambitions, and whose purpose is to facilitate and guarantee the implementation of the updated NDCs and the fulfillment of these commitments.

The PNAC identifies the instruments of existing support at the sectoral level, the entities and organizations that must be involved in NDC implementation and the monitoring indicators that will allow NDC monitoring.

The PNAC also includes cross-cutting actions to climate action related to commitments in terms of strengthening capacities for action and transparency that meet the requirements of the Paris Agreement and the guidelines.
