## Topic(s)

Adaptation

## DESCRIPTION

This protocol is designed to assist practitioners figure out how vulnerable infrastructure is to the effects of climate change while considering the wider social-ecological system and the potential impacts on the system if the infrastructure is damaged or destroyed.

The most important part of this PIEVC Green Protocol document is the five-step method for assessing the risk of climate change to infrastructure, which considers the larger social-ecological system.

There are also three more steps for finding and evaluating adaptation.
