## DESCRIPTION

Net Zero on Campus Guide strictly dives into the decarbonization of campus operations.

The guide offers both “why” and “how-to” information, outlining both the steps of the decarbonization journey, as well as practical campus initiatives across the action areas of energy, mobility, facilities, waste and recycling, procurement and initiatives that extend beyond campus operations.

The guide is especially applicable to campus sustainability managers, university board members and directors, and student bodies.

Available in English and Spanish.
