## DESCRIPTION

This institutional mapping report focuses on climate change related sub-national level institutional arrangements in Sri Lanka, placing high emphasis on mitigation and low emission development.

It seeks to identify and map the key stakeholders at sub-national levels in Sri Lanka, to improve clarity on institutional jurisdictions, functions, and mandates across levels of government and civil society to deliver emission reductions and improve the climate resilience of infrastructure services, to understand the potential subnational governance role in developing and achieving national level climate change targets; to understand sub-national stakeholders can play the potential influence and role on Climate Change.
