DESCRIPTION

This Technical Guide for the Development of Long-Term Low Emission Development Strategies in Africa has been developed to assist African countries in formulating their LT-LEDS. The guide outlines the steps and processes involved in developing the LT-LEDS, from setting national priorities and establishing institutional frameworks to engaging stakeholders and implementing policies. It draws on best practices and lessons learned from both within and outside the continent, emphasising the importance of aligning LT-LEDS with national development plans and international commitments, such as the Nationally Determined Contributions (NDCs) and National Adaptation Plans (NAPs).
