

***Building collective and individual learning  
towards a transition to a low greenhouse gas  
emitting society***

*Presentation by*

**Kingdom of Saudi Arabia**

*Forum on the impacts of the implementation of response measures*

# ***Guiding Principles***

- **Eradicating poverty top priority objective to achieve sustainable economic growth.**
- **Enabling access to sustainable and affordable modern energy services.**
- **Promoting innovation, technology development, transfer and dissemination.**

# ***Guiding Principles***

- **Differentiation between countries included in Annex I of the Convention and those that are not.**
- **Ensuring just transition of the workforce and the creation of decent work and quality jobs.**

## ***Transition to a low greenhouse gas emitting society***

- **UNFCCC Article 4.8; and subsequent agreed decisions (ex. 5/CP.7, 1/CP.10, 31/CMP.1), provide the basic implementation strategy.**
- **Set realistic objectives for sustainability.**
- **Efforts should be based on national circumstances, be affordable and practically implementable.**

## ***Way forward:***

- **Implementation of relevant agreed decisions... (ex. 5/CP.7, 1/CP.10, 31/cmp.1)**
- **Further evaluation and understanding of the concept: '*low greenhouse gas emitting society*'**
- **Technology dissemination and capacity building based on national priorities**
- **Promotion of awareness, education and training.**
- **Sharing experiences on the development of measures and methodologies aimed at increasing economic resilience.**

## ***Way forward:***

- **Integrating economic diversification into sustainable development plans.**
- **Cooperating in the development and transfer of technology for promoting energy efficiency.**
- **Technology driven solutions to reduce emissions which do not necessarily require a move to reduce consumption of fossil fuels such as carbon capture and storage (CCS).**

**Thank you!**
