U.S. FAST START FINANCE IN FISCAL YEAR 2010

INFORMATION EVENT ON SUBMISSIONS BY DEVELOPED COUNTRIES ON FAST START FINANCE
JUNE 11, 2011

JONATHAN PERSHING
US DELEGATION
U.S. Commitment to Fast Start Finance

• 18 months after Copenhagen the U.S. is on target to meet its share of the global $30 billion pledge.

• U.S. fast-start finance is new and additional. We are working to ensure that fast start climate resources complement rather than divert from existing development assistance priorities.

• U.S. federal budget is formulated on an annual basis. So although fast start finance is a three-year aggregate commitment, the U.S. contribution will be decided in annual portions.

• For the first of the three years, Fiscal Year 2010, the U.S. contribution to fast start financing consists of $1.3 billion of Congressionally-appropriated assistance plus $400 million of development finance and export credit, for a total of $1.7 billion.

• FY10 climate assistance represents a more than three-fold increase overall, and a ten-fold increase in adaptation assistance. U.S. climate finance is supporting action in every region of the world.
Components of U.S. Fast Start Finance in FY 2010

<table>
<thead>
<tr>
<th>Total FY10 U.S. Government Climate Funding</th>
<th>(in '000s)</th>
</tr>
</thead>
<tbody>
<tr>
<td>USAID, State &amp; Treasury</td>
<td>1,345,000</td>
</tr>
<tr>
<td>Other Agencies - Development Assistance</td>
<td>58,000</td>
</tr>
<tr>
<td>Finance &amp; Export Credit Agencies</td>
<td>408,000</td>
</tr>
<tr>
<td>Total U.S. Government Climate Funding</td>
<td>1,753,000</td>
</tr>
</tbody>
</table>

- USAID, State & Treasury: 74%
- Other Agencies - Development Assistance: 3%
- Finance & Export Credit Agencies: 23%
Programs and agencies

**USAID:** Bilateral climate change assistance programs in clean energy, adaptation, and sustainable landscapes in 56 country, regional, and program offices globally.

**State:** Programs related to the UNFCCC, Clean Energy Ministerial, Global Methane Initiative, and other multilateral negotiations and partnerships.

**Treasury:** Multilateral development bank-run global programs and initiatives, such as the Climate Investment Funds and the Global Environmental Facility.

**The U.S. also deploys the technical expertise of other government agencies including the Departments of Energy and Agriculture; the Environmental Protection Agency; the National Oceanographic and Atmospheric Administration, and others through international cooperation efforts that support developing countries’ mitigation and adaptation activities.**
U.S. Government Fast Start Financing in 2010

- Tripling of direct climate change foreign assistance from 2009 to 2010 in response to Copenhagen Accord

(Appropriated climate finance through USAID and Departments of State and Treasury (not including programs with climate co-benefits) (Totals in millions; appropriations by fiscal year)}
Key Priority Areas

- **Adaptation**: Investments prioritize small island developing states (SIDS), least developed countries (LDCs), and glacier-dependent countries. Programs increase impact, effectiveness and sustainability of development interventions and improve resilience among populations.

- **Clean Energy**: The U.S. works in a broad range of countries. Programs focus on energy efficiency, and development & deployment of renewable energy sources, support to Low Emissions Development Strategies (LEDS).

- **Sustainable Landscapes**: Focus on countries with globally important forest landscapes. Three focal areas: REDD Architecture, Readiness, and Demonstration.
Sample USAID programs

• **Adaptation**: An $8.5 million program in **sub-Saharan Africa** to support improved climate observations, risk management, and policies to inform decision making and adaptation; building community capacity to adapt through vulnerability assessments; prevention of waterborne disease; integrating climate change into agriculture and health

• **Clean Energy**: In **Mexico**, $1.8 million to support clean energy with research into cutting edge technologies, building capacity of states and municipalities on energy supply, addressing regulatory barriers to a regional U.S.-Mexico renewable energy market

• **Sustainable Landscapes**: In **Indonesia**, $6 million to develop sustainable business models that reduce net emissions from the forest sector; $5 million to establish a climate change center to link Indonesian practitioners to U.S. government technical expertise, such as the U.S. Forest Service
Multilateral climate funds supported in FY 2010

- Clean Technology Fund (CTF) $300 m
- Pilot Program for Climate Resilience (PPCR) $55 m
- Forest Investment Program (FIP) $20 m
- Global Environmental Facility (GEF - climate) $37 m
- Least-Developed Countries Fund (LDCF) $30 m
- Special Climate Change Fund (SCCF) $20 m
- Forest Carbon Partnership Facility (FCPF) $10 m
